eWork signs frame agreement with one of the world's leading telecom suppliers

eWork, the leading consultant broker in the Nordic countries, has signed a frame agreement with one of the world's leading telecom suppliers. eWork will provide its new client with IT-consultants.

— Frame agreements are the foundation of our business and frame agreements are of great importance for our possibility to reach our high growth. According to our experience this is one of our bigger frame agreements and this client will presumably become one of our top 5 customers, says Claes Ruthberg, CEO at eWork.

eWork has frame agreements with large companies such as Nordea, Scania, TeliaSonera, OMX, FMV (Swedish Defence Materiel Administration), Statskontoret (Swedish Agency for Public Management), Alecta, Scania, IBM, Ericsson, SEB and Swedbank.

— It is very encouraging that such a large company as our new client will use eWork to meet their future demand of IT-consultants, comments Claes Ruthberg.
