

## PRESS RELEASE from NCC

2008-07-04

No 29/08

### **NCC to construct treatment plant for Stockholm Vatten**

**NCC Construction Sweden has been commissioned to conduct blasting works and to construct a wastewater-treatment plant at Henriksdal, Stockholm. The client is Stockholm Vatten and the order is worth approximately SEK 170 million.**

The assignment comprises the blasting of tunnels and rock caverns at Henriksdalsberget, which will then be used to construct a new plant for the basic treatment of wastewater, plus a recipient for organic materials. It also includes the need for NCC to coordinate all installation contracts in the project.

The currently existing treatment plant has to be relocated to enable construction of the "Danvikslösen" traffic solution, which includes the need to direct the Värmdöleden highway through the rock at Henriksdalsberget and to extend the light-railway service to Slussen.

– We are delighted to have been commissioned for such a large-scale project as this. The assignment entails that all civil engineering disciplines and works be performed in surroundings where ordinary operations will continue to be conducted, says Göran Ajling, Business Manager at NCC Construction's Stockholm/Mälardalen region.

Work will commence in August 2008 and is scheduled for completion in May 2011. In total, 25-30 people will be engaged in the project.

The contract will be registered among orders during the third quarter of 2008.
