Cybercom creates website for Swedenergy

Cybercom has been commissioned to build a new website for trade organisation Swedenergy (Svensk Energi). The new website will serve as a central communication portal and e-commerce site for Swedenergy's services.

"We want to create a modern site that better meets the needs of visitors while supporting our communication objectives. The site will also serve as a hub for the promotion of expertise in the electricity industry," says Mattias Jönsson, web manager at Swedenergy.

Cybercom will reconstruct the site in a recent version of Episerver. The aim is to create a website that increases business and works more effectively for the editors and more easily for users.

The site will be completed during the autumn and work will be conducted through delivery from Cybercom in Stockholm and Mumbai.

"We won the assignment thanks to Swedenergy's confidence in our consultants and Cybercom's broad expertise in websites and web strategies," says Lukas Edenfeldt, account manager at Cybercom.

Swedenergy is a trade organisation for Sweden's electricity producers, grid operators and electricity suppliers.
