About Transmode

Transmode is a global provider of packet-optical networking solutions that enable fixed line and mobile network operators to cost effectively address the capacity needs created by the rapid growth in video and data traffic. These solutions are important building blocks in next-generation high-speed optical networks that support services such as broadband backhaul, mobile data backhaul, video delivery services and cloud computing. Transmode's solutions are based on [Wavelength Division Multiplexing](#) (WDM) and [packet optical transport](#) technologies, which are designed to increase the capacity, flexibility and functionality of optical metro core and metro access networks. Transmode's [Intelligent](#)

[WDM \(iWDM™\)](#) approach gives key advantages to customers, such as ultra-low latency, low power consumption and innovative network design.

Transmode is headquartered in Stockholm, Sweden and is listed on the NASDAQ OMX Stockholm Exchange (TRMO). Since 2000 the company has installed more than 30,000 systems for over 400 [fixed](#) and [mobile](#) network operators, service providers, large enterprises and public institutions in over 40 countries across the globe.
