# Report for the third quarter of 2012

#### Nine months

- Net turnover amounted to SEK 13,128 M (13,380).
- Operating profit excluding items affecting comparability amounted to SEK 183 M (344).
- Profit for the period was SEK 75 M (321) and earnings per share SEK 3.00 (12.85).
- Operating cash flow amounted to SEK 466 M (466).

## Third quarter

- Net turnover amounted to SEK 3,824 M (4,179).
- Operating profit excluding items affecting comparability amounted to SEK 50 M (105).
- Operating cash flow amounted to SEK 30 M (273).

In a comment on the third quarter, Bilia's Managing Director Per Avander says:

"Demand for new cars and service declined as expected during the quarter. Operating profit was at a much lower level than last year, but still acceptable compared with the second quarter of the year. We have taken a first step in adapting the operation in Denmark to the new market situation by closing one dealership and discontinuing one wholesale operation. We reported a very good cash flow during the first nine months of the year, and the Group's financial position continues to be strong. We project that demand for new cars and service will be at a lower level during the fourth quarter compared with last year, but on a level with the market situation during the third quarter."

# Third quarter 2012

Demand for new cars and service was at a lower level compared with the same period last year.

Net turnover amounted to SEK 3,824 M (4,179). For comparable operations and adjusted for exchange rate changes, net turnover decreased by about SEK 480 M or 12 per cent. The decrease is mainly attributable to lower sales of new cars and service.

Operating profit amounted to SEK 19 M (96). If items affecting comparability are excluded, operating profit amounted to SEK 50 M (105). The lower profit is mainly attributable to lower demand in the Service Business. Demand for and sales of new cars also declined, which affected earnings in the Car Business. Cost-cutting measures adopted during the preceding and current quarters reduced the cost level during the quarter by about SEK 8 M. The underlying costs decreased by about 1 per cent and amounted to 14.1 per cent in relation to net turnover, which was 1.6 percentage points higher compared to last year.

Net financial items amounted to SEK -4 M (-5). The improvement is mainly attributable to lower net debt and a lower interest rate level. The figure includes a profit share of SEK 4 M (4) from the associated company Volvofinans Bank AB.

Tax for the period amounted to SEK -25 M (-23). The period's high effective tax rate is attributable to the fact that no tax asset has been recognised on the deficit for the quarter in Denmark and that the tax asset attributable to unutilised tax-loss carryforwards in Denmark has been written down to SEK 0.

The loss for the period amounted to SEK 10 M (profit: 68) and loss per share to SEK 0.40 (EPS: 2.75). Exchange rate changes had a positive effect on the profit by SEK 1 M.

Total assets decreased during the quarter by SEK 273 M to SEK 5,323 M. The decrease is mainly attributable to fewer cars in stock and lower trade receivables.

Equity decreased during the quarter by SEK 34 M, amounting to SEK 1,658 M. Buy-back of own shares amounted to SEK 18 M. The equity/assets ratio amounted to 31 per cent (32).

Investments and disposals amounted to a net of SEK 25 M (14). Replacement investments represented SEK 6 M (7), expansion investments SEK 12 M (4), environmental investments SEK 0 M (0), investments in new construction and additions to properties SEK 8 M (3), and finance leases SEK -1 M (0).

Operating cash flow amounted to SEK 30 M (273). After acquisition of operations and change in interest-bearing receivables, cash flow amounted to SEK 56 M (277). Net debt decreased by SEK 43 M during the quarter, amounting to SEK 317 M.

Liquidity remains good, and at the end of September a debt to the banks of SEK 33 M was reported. The combined credit limit with Nordea and DNB amounts to SEK 900 M.

The number of employees declined by 143 during the quarter to 3,377 persons. The sale of the operations in Moss and Fredrikstad has reduced the number of employees by 35.

For the first nine months of the year, "Gain from sale of operation" pertains to the BMW operation in Moss and Fredrikstad. "Structural costs etc." pertains to measures aimed at reducing future costs and closure/discontinuation of operations, with an earnings improvement of about SEK 75 M from 2013.

- Weak earnings in Denmark
- Order backlog increased during the quarter

The market for new cars decreased during the quarter by 13 per cent in Sweden, while it increased by 21 per cent in Denmark and 1 per cent in Norway.

The Group reported an operating profit, excluding items affecting comparability, of SEK 50 M (105) and an operating margin of 1.3 per cent (2.5). The poorer results are mainly attributable to lower demand in the Service Business. Turnover from sales of new cars declined sharply during the quarter, which had a negative impact on earnings in the Car Business. The order backlog increased by 914 cars during the quarter.

The operation in Sweden reported an operating profit of SEK 53 M (83). The decline is mainly attributable to fewer deliveries of new cars and lower turnover in the Service Business. The Service Business reported a profit that was SEK 21 M lower compared with last year. Sales of used cars continued to develop positively, and both gross profit margin and earnings improved compared with the second guarter, as well as with the same guarter last year.

Operating profit in Bilia's Norwegian operation amounted to SEK 19 M, compared with a very strong profit of SEK 33 M last year. The Car Business reported a profit that was SEK 6 M better than last year. The decline is mainly attributable to lower underlying new car sales, excluding the acquisition of Stenshagen Bil, and a slightly lower margin on sales of used cars. The introduction at the beginning of the year of the concept - so successful in Sweden - of personal service technicians led to costs that were charged to earnings in the Service Business during the third quarter as well. Three more workshops have been converted to the new concept during the quarter, and the remaining four facilities will be converted during the coming six-month period. The Service Business reported earnings that were SEK 8 M lower compared with last year.

The Danish operation reported an operating loss of SEK 14 M (loss: 2). Demand for service remained at a low level, and turnover declined by 15 per cent. A legal change was made in the system of charges for new cars at the end of February which resulted in an increased demand for small, less expensive cars. The small car segment accounted for fully 60 per cent of the total market during the quarter. A decision was made during the quarter to close a dealership, discontinue a wholesale operation and further reduce the number of employees. Together with the cost-cutting programme decided on during the second quarter, these measures are expected to improve earnings by about SEK 25 M per year with full effect in 2013. Further measures may be implemented in the fourth quarter.

## Review report

#### Introduction

We have reviewed the interim report for Bilia AB for the period 1 January 2012 to 30 September 2012. The Board of Directors and the Managing Director are responsible for the preparation and presentation of this interim financial information in accordance with IAS 34 and the Annual Accounts Act. Our responsibility is to express a conclusion regarding this interim financial information based on our review.

#### Aim and scope of review

We conducted our review in accordance with the Standard on Review Engagements SÖG 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review has a different aim and is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and other generally accepted auditing practices. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Therefore, the conclusion expressed based on a review does not give the same level of assurance as a conclusion expressed based on an audit.

#### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information has not, in all material respects, been prepared in accordance with IAS 34 and the Annual Reports Act as regards the Group and in accordance with the Annual Reports Act as regards the Parent Company.
