6:

Supply Chain Solutions

BENEFITS

1 INCREASES PRODUCTIVITY

of your workforce by providing real-time mobile access to Microsoft Dynamics AX 2012 on handheld and vehicle mounted devices.

2 ENSURES EASY AND RELIABLE DATA COLLECTION

via barcodes or keyboard input, thereby reducing allocation errors and increasing inventory accuracy of information and delivery of goods.

3 DELIVERS VISIBILITY OF PROCESSES

in inbound, warehouse, and outbound logistics by providing support to high-volume transactions.

4 PROVIDES FAMILIAR, EASY TO LEARN AND USE.

mobile AX forms for fast and accurate data collection using text-to-speech technology.

5 OFFERS A NATIVE MOBILE CLIENT

based on Microsoft Dynamics AX 2012 based on Windows 8 style-eliminating the need for other technologies, thereby reducing the cost of implementation and ownership.

6 RUNS ON WINDOWS MOBILE AND WINDOWS CE

devices from industry leaders such as Motorola and Honeywell (LXE, Intermec).

DATA COLLECTION STUDIO

Increase Accuracy and Productivity with Fast and Reliable Data Collection and Boost Efficiency in Supply Chain Execution.

Do you require your warehouse or manufacturing workers to register transactions like goods receiving, transfer, and picking rapidly and efficiently, by using handheld or vehicle-mounted devices? Columbus offers the solution to ensure fast, cost effective data collection from remote locations. Columbus Data Collection Studio delivers Microsoft Dynamics AX standard and customized functionality, including barcode data collection, to industrial PDAs.

Columbus Data Collection Studio 2013 provides your workers with remote access to Microsoft Dynamics AX 2012. The solution supports many standard Microsoft Dynamics AX processes, ranging from inbound, to warehouse, and outbound logistics.

Data Collection Studio 2013 runs on the handheld devices made by industry leaders, without dependency on device types or brands. It only requires Windows Mobile or CE. Because Data Collection Studio runs on native Microsoft Dynamics AX, AX developers and consultants can further customize the forms to adapt to customer requirements. The solution provides a standardized integration with Bartender. You can design labels in Bartender and print labels from your handheld device.

FEATURES

Data collection

Ensures fast and reliable data collection by using barcode scanning that supports multiple barcode formats (UCC/EAN).

Standardized processes

Allows your warehouse workers to work remotely and in real time with standard Microsoft Dynamics.

User experience

Delivering exceptional user experience with Windows 8 style user interface and text-to speech technology.

Label printing

Provides standardized integration with Bartender in order to design and print labels on (mobile) printers.

Inbound logistics

Supports standardized processes of receiving and put-away processes.

Warehouse logistics

Supports standardized processes of counting, printing, refilling, transport, and shipping.

Outbound logistics

Supports standardized processes of picking and shipping.

Multiple industries

Supports standardized warehousing and distribution processes in distribution, manufacturing, and retail.
