** Excl. items affecting comparability.

The market situation for newsprint in Europe was weak during the first quarter of 2008. Deliveries to Europe were 2\% lower than in the corresponding period in 2007.

Deliveries of MF Magazine to Europe remained unchanged whilst deliveries of SC Paper to Europe rose by $1 \%$ and of coated paper by $2 \%$.

Holmen Paper's deliveries rose by 3\% in relation to the first quarter of 2007. Compared with the fourth quarter deliveries fell by $10 \%$, mainly due to seasonal factors. As a result of reductions in the price of newsprint and MF Magazine the prices of Holmen Paper's products were on average some $4 \%$ lower than during the first quarter of 2007.

Holmen Paper's operating profit for January-March 2008 amounted to MSEK 80 (160). The deterioration in the result was due to lower selling prices, higher cost of wood, and a weak US dollar that had an impact on the profitability of sales to markets outside Europe. However, higher volumes had a favourable effect on the result.

Compared with the fourth quarter the operating profit declined by MSEK 27. The result was adversely affected by lower selling prices and higher energy costs whereas maintenance costs were seasonally lower.

The announced restructuring of Holmen Paper Hallsta is underway and negotiations are being held with the object of closing down one of the paper machines (PM2) on 1 November 2008. PM2 has a capacity of 110000 tonnes per year and the aim, together with the transfer of production to other machines, is to reduce standard newsprint capacity by 150000 tonnes. The cost of closing down PM2 is estimated at around MSEK 100, although no provision has yet been made for the future cost. In connection with these changes Holmen Paper intends to continue to grow within the strategic book paper product area.

The market situation for virgin fibre board in Europe weakened slightly during the first quarter. Deliveries from European producers to Europe were slightly lower than for the same period last year, while exports to markets outside Europe rose.

In Great Britain price increases have been announced for folding box board within the graphics and packaging board segments.

Iggesund's deliveries amounted to 127000 tonnes, which was $5 \%$ lower than for the corresponding period last year. Further destocking in certain customer segments contributed to the weak volume trend. Compared with the fourth quarter of 2007 deliveries remained unchanged and prices were stable.

Iggesund’s operating profit for January-March 2008 amounted to MSEK 116 (206). The decline is mainly due to lower deliveries and higher wood prices. The weakening US dollar and the running-in of the rebuilt board machine at Iggesunds Bruk had an adverse effect on the result.

The result was MSEK 16 higher than for the fourth quarter of 2007.

** Excl. item affecting comparability.

The market situation for sawn timber continued to weaken during the first quarter of 2008. Producer stocks were high and deliveries fell on most markets. Prices have continued to decline.

Holmen Timber's operating profit for January-March 2008 amounted to MSEK 23 (32). The deterioration in the result was due to higher saw log costs.

Compared with the fourth quarter of 2007 the operating profit declined by MSEK 14 as a result of lower prices although deliveries increased.

The project of the new sawmill at the Braviken paper mill in Norrköping is continuing.

Wood prices in Sweden were stable during the first quarter, with the exception of some price increases of pulpwood in Central Sweden.

Holmen Skog's operating profit for January-March 2008 amounted to MSEK 151 (155). Earnings from operations (the result before change in value of forests) increased by MSEK 29 to MSEK 172 as a consequence of higher wood prices.

Biological assets (forests) are valued at fair value in accordance with IAS 41. The change in value, i.e. the increase in the value of the forests less harvesting during the period, amounted to negative MSEK 21 (positive 12).

Compared with the fourth quarter of 2007 earnings from operations declined by MSEK 38, which is mainly explained by seasonally lower harvesting.
