Scandinavian Private Equity A/S

About SPEAS

SPEAS was the first listed company in Denmark to offer a wide group of investors access to private equity fund investments. SPEAS focuses on funds which primarily invest in Europe and where at least one of the Nordic countries is included in the geographic focus, with buy-out funds as the main target. This focus has been chosen given the networks, long experience and competency within this field of the managements of SPEAS and Scandinavian Private Equity Partners A/S (the associated management company) and the historically very attractive returns generated by Nordic buy-out funds.
