Securities Note

1 Risk factors

The Issuer considers the following factors may affect its ability to fulfil its obligations under the Bills and to be material for the purpose of assessing the market risks associated with the Bills. Most of these factors are contingencies which may or may not occur and the Issuer is not in a position to express a view on the likelihood of any such contingency occurring.

The Issuer considers the factors described below to represent the principal risks inherent in investing in the Bills, but the inability of the Issuer to pay interest, principal or other amounts on or in connection with the Bills may occur or arise for other reasons than those that the Issuer may currently be able to anticipate.

Issuer's accountability for making payments

The Issuer is accountable for making payments on the Bills when due. The obligations of the Issuer under the Bills are direct, unsecured, unconditional and unsubordinated obligations, equally ranked without any preference amongst themselves and equal to the Issuer's other direct, unsecured, unconditional and unsubordinated obligations.

The Issuer has not entered into any restrictive covenants in connection with the issuance of the Bills regarding its permission to incur additional indebtedness ranking equally to the obligations under or in connection with the Bills.

Change of law

The Terms and Conditions of the Bills are based on Icelandic law in effect on the date of this Prospectus. No assurance can be given as to the impact of any possible judicial decision or change in Icelandic law or administrative practice after the date of this Prospectus.

The secondary market

Therefore, investors may not be able to sell their Bills easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market.

The Bills may not be a suitable investment for all investors.

Each investor in the Bills must determine the suitability of the investment in light of his own circumstances. In particular, each potential investor should:

1. Have sufficient knowledge and experience to make a meaningful evaluation of the Bills.
2. Understand the merits and risks of investing in the Bills and the information contained in this Prospectus. Potential investors should familiarize themselves thoroughly with this Prospectus.
3. Have access to, and knowledge of, appropriate analytical tools to evaluate, in the context of its particular financial situation, an investment in the Bills and the impact the Bills will have on its overall investment portfolio.
4. Have sufficient financial resources and liquidity to bear all of the risks of investing in the Bills.
5. Understand thoroughly the terms of the Bills and be familiar with the behaviour of any relevant indices and financial markets.
6. Be able to evaluate (either alone or with the help of a financial adviser) possible scenarios for economic, interest rate and other factors that may affect its investment and its ability to bear the applicable risks.
