Exchange notice**IT 74/13**

NASDAQ OMX Genium INET External Test System 2 Shutdown

Due to the successful launch of Collateral Management Service (CMS) and all members are now migrated to CMS, the Genium INET External Test System 2 will be closed down permanently October 10th, 2013.

Please connect to Genium INET External Test System 1 (full trading/clearing cycle) for continuous production like testing and Genium INET External Test System 4 if you would like to test Genium INET 3.0201.

All historical trades and orderbooks will be flushed from External Test Systems 2 and not migrated over to another external test system. Please contact Member Services for account details.

Please see

<http://www.nasdaqomx.com/transactions/technicalinformation/geniuminet/testing/> for more information about the External Test Systems

Please see below URL for connectivity details.

<http://www.nasdaqomx.com/transactions/technicalinformation/geniuminet/connectivity/access> FIX users need to contact Member Services for new TCP ports.
