

Press release

“Fixturlaser NXA Pro” from Elos subsidiary Elos Fixturlaser, has been nominated to “Product of the Year 2013”

The shaft alignment system Fixturlaser NXA Pro has been nominated as a finalist for the 2013 Product of the Year Award in the Maintenance Tools and Equipment category; a competition organized by the US based Plant Engineering Magazine. The competition recognizes the best new industrial products available in the United States. Elos Fixturlaser and VibrAlign, US distributor, has had several winners and nominees in previous competitions.

Hans Svensson, Elos Fixturlaser CEO, said of the nomination, - *“We are honored to once again be nominated to receive this prestigious award. We work very closely with VibrAlign on the development of new products that meet our customers’ shaft alignment needs. It’s gratifying to see our efforts recognized. The Fixturlaser NXA Pro represents years of planning and development and showcases our innovative design and user friendliness of our products.”*

The new Fixturlaser NXA Pro laser-based shaft alignment tool utilizes the latest technology in digital signal processing, as well as other innovations with advanced functions and capabilities, to provide faster and even more intuitive operation. For example, a MEMS (microelectromechanical systems) gyroscope in the display unit powers the new OmniView function. With OmniView, the screen display changes in real time to always show the machine being aligned from the same viewing angle as seen by the operator, i.e., the system logs the user’s position and keeps track of it in relation to the machine. No other laser alignment system can do this.

The US based Plant Engineering Magazine organizes the annual Product of the Year competition to recognize the best new industrial products available in the United States. For more than a quarter-century, Plant Engineering’s readers have selected the outstanding new products that help them do their jobs smarter, safer, more efficiently and more productively.

Lidköping, 11 November 2013

Elos AB (publ)
