

## **Micronic Mydata receives order for two LRS15000 mask writers for display applications**

Täby, Sweden – 2 December, 2013 Micronic Mydata AB (publ), listed on NASDAQ OMX Stockholm, Small Cap: MICR, has received order for two mask writers for display applications from a customer in Asia.

The first system is scheduled for delivery during the fourth quarter 2013 and the second in the end of 2014. This order is within the assessment for sales in 2013 of approximately SEK 950 million, which was published on 25 November.

“It is a pleasure to be able to offer our customer systems that meet their need for production capacity”, said Lena Olving, president and CEO of Micronic Mydata AB. “These systems are not designed for the most advanced display applications, instead they are industry standard systems and mainly used in volume production.”

### **About Micronic Mydata AB**

Micronic Mydata AB is a Swedish high-tech company engaged in the development, manufacture and marketing of production equipment to the electronics industry. The products consist of pattern generators including mask writers and direct writers for the production of photomasks and substrates as well as advanced surface mount technology (SMT) equipment. The pattern generators are used by the world's leading electronics companies in the manufacture of semiconductor circuits, for advanced electronic packaging and displays used in PC tablets, smart phones, TVs and computers. The SMT equipment is used for surface mounting of electronic components and stencil free jetting of solder paste. The SMT equipment is used, among others, by large and small manufacturers of electronics in aerospace, aviation and telecom. Micronic Mydata headquarters is located in Täby, north of Stockholm and the Group has subsidiaries in China, France, Germany Japan, Singapore, South Korea, Taiwan, the Netherlands, United Kingdom and the United States.
