## Notes and definitions

(1) The amount is already included in the computation of the eligible capital and reserves and it is provided separately for information purposes.

## Explanatory footnotes

Insurance company investments, deducted in equal proportions from Tier 1 and 2 capital, came to EUR 2,309 million (2,419). A total of EUR 469 million (498) have been deducted from equity capital as a shortfall of expected losses and impairment losses. Deductions from Tier 2 capital exceeded Tier 2 capital by EUR 467 million (364), which were deducted from Tier 1 capital.

The Finnish Financial Supervisory Authority has given permission, valid from 1 January until 31 December 2014, to OP-Pohjola Group not to deduct insurance holdings under supervision of financial and insurance conglomerates from their capital base and to treat these holdings as risk-weighted assets in accordance with the principles of capital adequacy measurement. In determining the risk weight of insurance holdings, OP-Pohjola Group will apply a method which, in accordance with the Supervisory Authority's permission, will lead to a risk weight of approximately 280 per cent. The change in the treatment stems from the new Capital Requirements Directive (CRD4) and Capital Requirements Regulation (CRR) published on 27 June 2013. As a result of the European Central Bank taking over supervisory responsibilities for OP-Pohjola Group as credit institution, the ECB will decide on whether any further special permission is given to OP-Pohjola Group.

### Notes and definitions

(1) The exposures reported cover only exposures to central, regional and local governments on immediate borrower basis, and do not include exposures to other counterparties with full or partial government guarantees

(2) The banks disclose the exposures in the "Financial assets held for trading" portfolio after offsetting the cash short positions having the same maturities.

(3) The exposures reported include the positions towards counterparties (other than sovereign) on sovereign credit risk (i.e. CDS, financial guarantees) booked in all the accounting portfolio (on-off balance sheet). Irrespective of the denomination and or accounting classification of the positions the economic substance over the form must be used as a criteria for the identification of the exposures to be included in this column. This item does not include exposures to counterparties (other than sovereign) with full or partial government guarantees by central, regional and local governments.

### Notes and definitions

(1) The exposures reported cover only exposures to central, regional and local governments on immediate borrower basis, and do not include exposures to other counterparts with full or partial government guarantees

(2) The banks disclose the exposures in the "Financial assets held for trading" portfolio after offsetting the cash short positions having the same maturities.

(3) The exposures reported include the positions towards counterparts (other than sovereign) on sovereign credit risk (i.e. CDS, financial guarantees) booked in all the accounting portfolio (on-off balance sheet). Irrespective of the denomination and or accounting classification of the positions the economic substance over the form must be used as a criteria for the identification of the exposures to be included in this column. This item does not include exposures to counterparts (other than sovereign) with full or partial government guarantees by central, regional and local governments.
