IT 7/14**IT – Important changes to CW1 and pending OTC reported trades**

With the coming Genium INET 4.0201 release, pending Tailor Made (Flex) trades that previously were monitored in the "Holding Deal" window in Clearing Workstation 1 (CW1) will now be found in the window "OTC Reported Trades". In addition, CW1 users are required to use version CW1_3.0.0201_6__r47575 part of the 3.0.0201 release (from 9 Dec 2013) or later in order to continue to monitor holding Tailor Made trades after the upgrade to 4.0201.
