Nordecon overview

Nordecon in brief

KEY FACTS

- Nordecon is a group of construction companies whose core business is construction project management and general contracting in the buildings and infrastructures segment
- Geographically the Group operates currently in Estonia, Ukraine and Finland. The parent of the Group is Nordecon AS, a company registered and located in Tallinn, Estonia. In addition to the parent company, there are more than 10 subsidiaries in the Group
- Currently Nordecon employs more than 700 people
- Since 18 May 2006, the company's shares have been quoted in the main list of the NASDAQ OMX
 Tallinn Stock Exchange

Nordecon in brief

VISION: To be the preferred partner in the construction industry for customers, subcontractors and employees.

MISSION: To offer our customers building and infrastructure construction solutions that meet their needs and fit their budget and thus help them maintain and add value to their assets.

SHARED VALUES:

Professionalism

We are professional builders – we apply appropriate construction techniques and technologies and observe generally accepted quality standards. Our people are results-oriented and go-ahead; we successfully combine our extensive industry experience with the opportunities provided by innovation.

Reliability

We are reliable partners – we keep our promises and do not take risks at the expense of our customers. Together, we can overcome any construction challenge and achieve the best possible results.

Openness

We act openly and transparently. We observe best practice in the construction industry and uphold and promote it in society as a whole.

Employees

We inspire our people to grow through needs-based training and career opportunities consistent with their experience. We value our employees by providing them with a modern work environment that encourages creativity and a motivation system that fosters initiative.

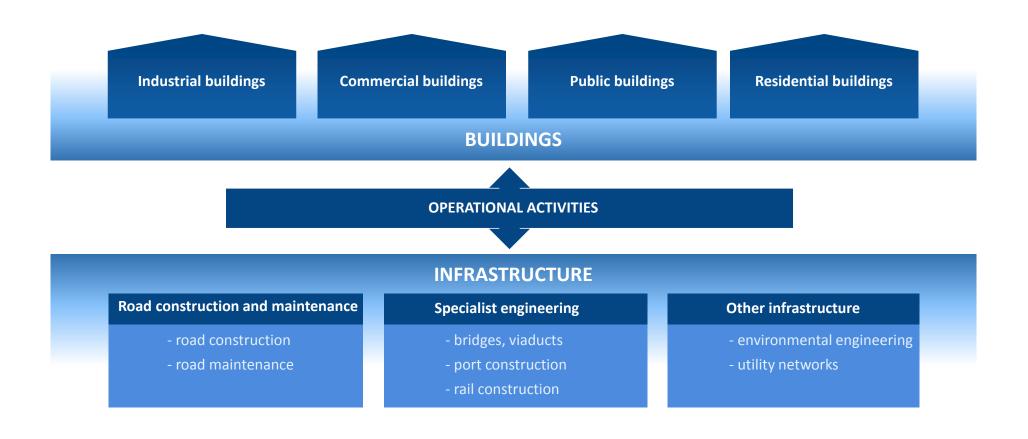

Nordecon Group's main strategic objectives until 2013 (incl.)

- To complete the significant adjustments to the Group's structure and governance that were launched in 2009 in order to secure profitable and rapid growth in the rise phase of the market
- To operate in Latvia, Lithuania and Belarus on a project basis, assuming that this is profitable
- To continue buildings construction operations in Ukraine in line with the current strategy
- To maintain preparedness for re-launching more active operations in foreign markets
 (as a general contractor) as soon as the situation in the construction market has become sufficiently supportive
- To operate in the Finnish concrete works market (as a contractor) through a subsidiary in order to support development of the business line
- To become the leading construction group in Estonia that earns half of its revenue from infrastructure and the other half from buildings construction by the end of 2013

Business model

Group's strengths

- An organisation with shareholders oriented towards long-term profitable growth
- A flexible, horizontally integrated business model across the Group
- Experienced management
- Professional and loyal employees
- Relative conservatism in risk-taking
- Selected support services centralised group wide (e.g. IT, legal) to streamline costs
- Revenue base aimed at dividing activities between buildings and infrastructure segments equally to minimise volume risk
- Group covers all main sub-segments in the construction markets

Core Competencies

Road construction and Environmental Other infrastructure maintenance construction Commercial buildings development

Nordecon financial information and key facts

12m 2013

Period in brief

- Sales exceeded 2012 comparative figure by 9%. Main driver for growth were large road construction projects, increased share of environmental engineering and commercial buildings.
- Factors contributing to growth of gross margin increased market volumes, stable input prices and unrealised risks in completion phase of utility networks and environmental engineering.

 Gross margin reached 6.9%, resulting in gross profit of 11.9 mEUR (2012: 5.2%, 8.2 mEUR)
- Administrative expenses remained under control at 2.9% to revenue (2012: 3.4%).
- Order book decreased by 49% compared to beginning of 2013. Led by infrastructure segment's reduced volumes of public tenders and progress of large road construction projects.
 Orders related to buildings now exceed infrastructure ones.
- Write-down of real estate and goodwill recorded in Q4 0.33 mEUR and 0.35 mEUR respectively.
- Strong outside pressure on liquidity created by gap between the timing of receipts form (public sector) clients and payments to subcontractors.

Investor Presentation

Key figures / ratios

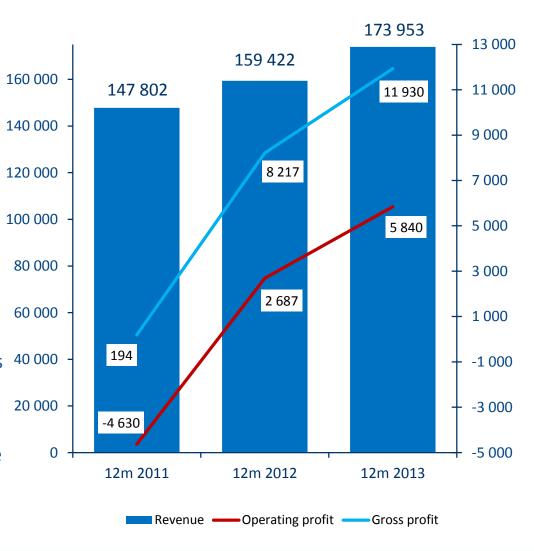

Figure / Ratio	12m 2013	12m 2012
Revenue (tEUR)	173,953	159,422
Revenue growth/decrease, %	9.1%	7.9%
Net profit/loss (tEUR)	5,200	1,926
Gross margin, %	6.9%	5.2%
EBITDA margin*, %	5.5%	3.0%
Net margin, %	3.0%	1.2%
Earnings per share (EUR)	0.17	0.05
Equity ratio, %	33.7%	27.1%
Administrative expenses to revenue	2.9%	3.4%

^{* 2013} figure includes write-down of goodwill of 0.35 mEUR

Revenue and profit

- Revenue growth driven by infrastructure segment. Large road construction projects on- ¹⁶⁰ 000 going from Q1 and ended in Q4.
- Smaller part of revenue increase attributed to buildings segment, especially to private sector clients
- Increased market volumes and stable input prices resulted in increased profits
- Strong contribution to gross profit from utility networks and environmental engineering segments. Past experience and unrealised risks in the completion phase as key drivers.
- Positive effect on operating profit from decrease of total marketing and administrative expenses by 0.3 mEUR compared to 2012

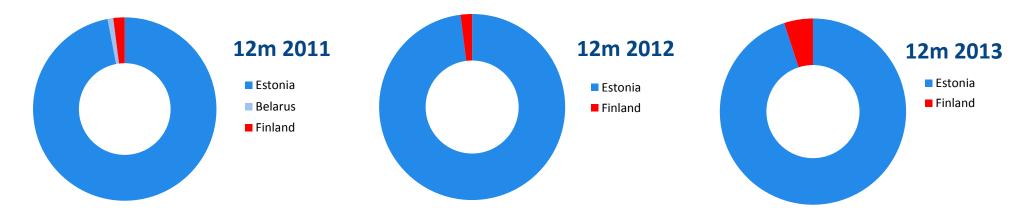

Revenue tEUR

Profit tEUR

Revenue by geographic regions

	12m 2011	12m 2012	12m 2013
Estonia	97%	98%	95%
Finland	2%	2%	5%
Belarus	1%	0%	0%

- Main focus to remain in Estonia until 2013 (incl.)
- Business in Finland remains limited to existing sub-segment (concrete works)
- In Ukraine ability to start again maintained

Order book

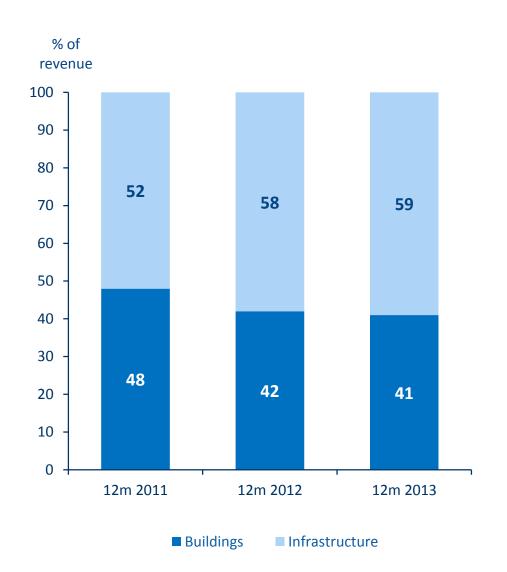

- Order book has decreased due to gradual performance of major contracts secured in 2011-2012. Addition of large contracts has been irregular. Public investments have decreased in 2013 because the end current of EU budget (2007-2013). Private investments volumes unable to compensate this.
- First time since Q1 2008 buildings segment orders exceed infrastructure ones (77% and 23% resp.). This structure likely to remain for 2014 and forward thus resulting in decreased revenue in infrastructure segment.
- 2013 biggest additions were the extension works of ASTRI shopping center in Narva (15 mEUR), Pirita 26 apartment building (10 mEUR), Väätsa dairy farm (9 mEUR) and waste water treatment plant in Paide (6.4 mEUR).
- Management's priority is not to increase or maintain the achieved level of revenue in a condition where the public investments to construction market are expected to shrink in 2014. The focus must remain on improving profitability.
- Management does not consider present decline in the order book to be critical. Based on historical experience, it is quite typical that a significant portion of budgeted operating volumes is secured through new contracts signed during the year.

Revenue distribution by segments

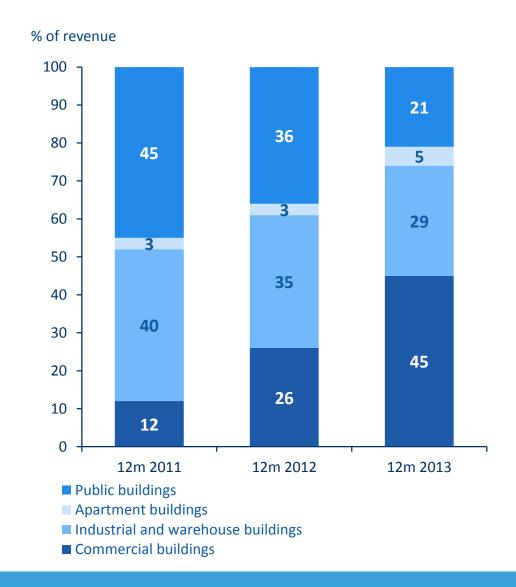

- Performance of three major road construction projects and increased environmental engineering attributed to increase of infrastructure segment revenue
- Despite the decline of buildings segment's share of revenue, the gross volumes grew by 7% compared to 2012

Revenue distribution – buildings

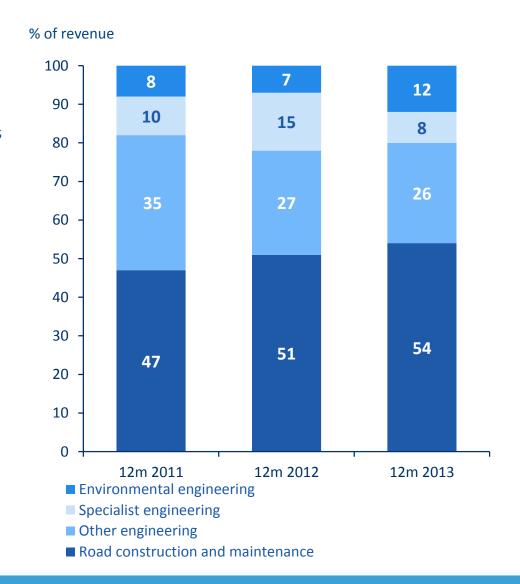

- Share of public sector contracts declining because of fierce competition and the Group has been avoiding excess risks. Also the absence of large contracts from prior periods influenced the decrease in volumes.
- Apartment buildings revenue mostly from construction, not development. The Group started one development project in Tallinn (<u>www.magasini.ee</u>) where I stage will be finished in 2014.
- Private investments made in industrial and warehouses segment helped compensate declining public investments to agriculture industry related buildings.
- A lot of new contracts signed with private clients in 2012-13. Commercial buildings volumes nearly doubled compared to 2012.

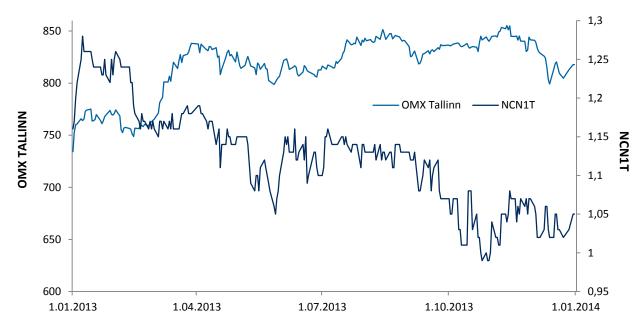

Revenue distribution – infrastructure

- Environmental infrastructure got more funding from EU during last years of 2007-2013 budget. Group has secured lately increased number of environmental engineering contracts.
- Specialist engineering (port construction) share decreasing as existing port construction contracts were nearly finished in 2013.
- EU supported utility networks (other engineering)
 volumes declining as the financing from the 2013
 ending EU budget is decelerating. Addition of new
 contracts this year thus smaller than in previous
 years.
- Road construction and maintenance segment strong as three major road projects were in construction through 2013 and finished by the end of the year.
