## INVISIO receives follow-up order of SEK 20 million from the U.S. Army

INVISIO (IVSO) has through its American partner TEA Headsets received its first follow-up order on complete communication and hearing protection systems, after the record order in October 2013 from the American military program TCAPS. The order is worth SEK 20 million and will be delivered during the second quarter of 2014.

– We are pleased to receive our next order from TCAPS. It shows the strength of being approved in the military program. As announced earlier, we are very optimistic about future sales potential within TCAPS and similar programs, although it is difficult to know when each order will be placed, comments Lars Højgård Hansen, CEO INVISIO Communications.

The military program TCAPS, Tactical Communication and Protective System, is managed by the organization PEO Soldier within the U.S. Army. The purpose of TCAPS is to provide hearing protection and auditory situational awareness devices to soldiers, to increase hearing readiness and reduce hearing damage in high noise and extreme conditions. Within TCAPS, extensive testing and evaluation of communications and hearing protection solutions has been conducted. Today, the INVISIO solution is approved for use.

INVISIO is world leading within specialized voice communication in all environments, in heavy noise as well as under water and extreme heat. With knowledge in sound transmission and the patented technology INVISIO Bone Conduction the company develops, markets, and sells advanced headsets, control units and peripherals for usage with two-way radio.

For more information (public) about TCAPS and PEO Soldier, please see below.

### **About TCAPS**

The Tactical Communication and Protective System (TCAPS) is a specific application program within PEO Soldier and the Project Management Office Soldier Warrior. It fields concurrent hearing protection and auditory situational awareness devices to Soldiers to increase hearing readiness and reduce hearing damage/subsequent post-service hearing disabilities resulting from high noise exposure for combat Soldiers.

TCAPS provides concurrent hearing protection and auditory situational awareness. Historically, Soldiers have had to choose between hearing protection and force protection. As a combat force multiplier, TCAPS maintains hearing protection while enabling Soldier to use existing tactical radio resulting in increased mission effectiveness, safety, and survivability.

**About PEO Soldier**

The U.S. Army's Program Executive Office (PEO) Soldier is a program that for the past decade has provided its Soldiers with capabilities to ensure they remain decisive and dominant throughout the full spectrum of military operations. PEO Soldier is making a deliberate effort to integrate technologies for the Soldier as a System, and to provide system solutions that provide the greatest capabilities for them. The mission is to develop, acquire, field and sustain affordable integrated state of the art equipment to improve Soldier dominance in Army operations today and in the future, with the Soldier as both its strength and purpose. PEO Soldier provides its Soldiers with the finest equipment and protection available as quickly as possible. They invest in their Soldiers to give them the decisive edge while also being good stewards of taxpayer funding. PEO Soldier manages more than 450 products and programs that are a manifestation of that dedication. There are four Project Management (PM) Offices, dedicated to providing the very best equipment: PM Soldier Protection and individual Equipment, PM Soldier Sensors and Lasers, PM Soldier Warrior (which includes TCAPS) and PM Soldier Weapons.
