

Press release

Ambu awarded Premier group purchasing contract for pain pumps

Ambu announced today that it has been awarded a national multi-source group purchasing agreement with Premier, Inc., a healthcare improvement company. The agreement covers Ambu's line of ACTion pain pumps. The 3 year contract has a start date of June 1st 2014.

The award of the Premier pain pump contract represents a significant milestone in our efforts to get a stronger foothold in the US market for regional anesthesia solutions. According to Lars Marcher: "It is a breakthrough for Ambu that we have been awarded the Premier contract and we are excited to have the opportunity to provide the 2,900 Premier member hospitals with our innovative and cost effective pain pumps and excellent customer service."

Ambu pain management solutions

The ACTion pain pumps are unique single-use pumps for post-operative pain management and are often used in connection with surgeries that will result in severe and prolonged post-operative pain. The use of pain pumps has been growing as they provide excellent pain management and can substantially reduce the need for narcotics that are typically used to manage post-operative pain, in many patients. Consequently, patients do not experience as many of the related side effects associated with narcotics, such as post-operative nausea, vomiting and respiratory depression. In addition, the use of pain pumps has been shown to improve ambulation and rehabilitation leading to faster discharge of patients.
