As of December 31, 2013, the Boguchany operating segment was classified as held for sale. As a result, financial results for the Boguchany segment were included in results from discontinued operations. In connection with the reclassification, an impairment loss of SEK 220.8 million related to Boguchany was recognized in Q4 2013.

\* Exchange rate of 6.5 SEK per USD used to translate SEK amounts to USD for reference purposes

\*\* Production figures include Arkhangelsk and Magistralny operations but do not include Ust-Ilimsk, Boguchany and Shenkursk

\*\*\* Adjusted for the reverse share split completed in April 2013

## Significant events during the three months ended December 31, 2013

 On December 23, 2013, RusForest announced a corporate structure simplification. The purpose of the corporate simplification is to strengthen the Company's corporate governance and internal controls, while at the same time reducing administrative costs and making the Group more tax efficient. The simplification includes removing the Cyprus holding companies and transferring ownership of RusForest's Russian forestry assets directly to the Swedish holding company.

## Significant events after the end of the period

- On January 13, 2014, RusForest announced the appointment of Gustav Wetterling as Chief Financial Officer ("CFO"), Gustav Wetterling joins RusForest from Black Earth Farming Ltd. (NASDAQ OMX: BEF) where he was Director of Procurement and previously Director of Investor Relations. He has also worked for Vostok Nafta Investment Ltd. (NASDAQ OMX: VNIL) and Svenska Handelsbanken in Moscow. Mr. Wetterling is a Swedish citizen and is fluent in Russian. He holds a Master of Science in Economics and Business from the Stockholm School of Economics.
- On January 22, 2014, the Company announced the start of wood pellet production ahead of schedule from the new pellet mill at the Company's LDK-3 sawmill in Arkhangelsk. As previously disclosed, RusForest engaged AS Hekotek, a mechanical engineering company, to build the wood pellet production facility. The pellet mill will have an annual capacity of up to 100,000 tons and will allow RusForest to monetize its sawmill byproducts by exporting wood pellets to Europe.
- On March 3, 2014, RusForest announced the sale of the non-core Boguchany unit in Eastern Siberia. The transaction includes the Boguchany sawmill, Boguchansky LPK for gross consideration of USD 8.0 million. The Boguchany sawmill has an annual capacity of 120,000 m<sup>3</sup>of sawnwood. The net cash received by RusForest after repayment of the sawmill's debts will be approximately USD 1.5 million. The Company has already received a cash pre-payment of USD 1.5 million from the buyer.

RusForest also announced signing a Memorandum of Understanding to sell the related Boguchany harvesting company, RusForest Angara LLC, to the same buyer for gross consideration of USD 5.8 million. The harvesting company holds forestry leases with 748,400 m<sup>3</sup> of annual allowable cut ("AAC"). The sale of the harvesting company is expected to close on or around September 30, 2014. The net cash received by RusForest after repayment of the harvesting company's debts is expected to be approximately USD 2.5 million.

As of December 31, 2013, the Boguchany business unit was classified as held for sale and therefore the financial result of the Boguchany segment was included into result from discontinued operations.

## **CEO Comment**

Dear RusForest Shareholders,

2013 was a turning point for RusForest. The restructuring transaction brought-in Nova Capital as a Russian strategic shareholder in March 2013 and accelerated the turnaround. When I joined as CEO in July 2013, I outlined an action plan for loss-making operations and improving operational results at every location.

In the last year, a number of things have changed and improved.

In Arkhangelsk, the launch of the new 100,000-ton/year wood pellet mill is increasing our likelihood of reaching positive cash flow later this year. The local project team managed to build the pellet mill on schedule and successfully pass the testing phase. The first pellets are being stored in our two silos and are ready for the first shipment to European customers.

In Magistralny, we made significant progress during 2013, exporting 32,400 cubic meters of sawnwood to Japan. In Q4 2013, the Magistralny operations generated USD 1.8 million of EBITDA.

Overall, RusForest's adjusted EBITDA loss from continued operations decreased by 83% from USD -6.0 million to USD -1.0 million when comparing Q4 2012 to Q4 2013. RusForest also managed to reduce overhead costs significantly in Q4 2013.

In March 2014, we announced the sale of our main non-core asset, the Boguchany sawmill (Boguchansky LPK). The decision to divest the Boguchany project was not easy, but it was necessary to achieve long-term profitability. The sawmill's isolated location, the lack of a market for residual by-products and a missing rail connection created a loss-making unit with challenging long-term prospects. The sale of the Boguchany sawmill improved our cash situation and allows management to focus on developing the remaining core RusForest assets.

In summary, RusForest is beginning the year with a clean slate and clear potential. Improving global sawnwood markets, growing wood pellet demand in Europe and the weakening Russian ruble gives RusForest strong momentum for 2014. Unfortunately, recent events between Russia and Ukraine have overshadowed the solid fundamentals of our business.

Regards,

Matti Lehtipuu Group CEO, RusForest AB (publ)

## **Company Overview**

RusForest is a Swedish forestry company operating in Eastern Siberia and the Arkhangelsk region of Russia. The Company controls long-term timber leases and utilizes these resources to produce a range of highquality sawnwood products.

Russia has the world's largest timber reserves by a significant margin and is strategically located in close proximity to Europe, China and Japan. Eastern Siberia is renowned for its pine and larch of exceptional quality, while the Arkhangelsk region in northwest Russia has high-quality spruce and pine forests similar to those found in northern Sweden.

RusForest's strategic objective is to become a leading integrated forestry company focused on exporting Russian softwood sawn wood, lumber and wood pellets to the most profitable markets in order to earn an attractive return for shareholders.

The Company is listed on NASDAQ OMX Stockholm First North (ticker symbol "RUSF").

RusForest AB's Certified Adviser on First North is Pareto Securities AB.

The Company's newly constructed pellet mill in Arkhangelsk, March 2014 (with all three presses operating as can be seen from the chimneys)

#### Notes to the volume figures:

- 1. The figures presented are given for reference purposes only. The grouping was made based on geography. Arkhangelsk includes Severny Les (harvesting operation), LDK-3 (sawmill, 95% owned) and Infa (planing mill). Boguchany includes RusForest Angara (harvesting operation), Boguchansky LPK (sawmill) and other forest lease-holding companies. Ust-Ilimsk includes RusForest Ust-Ilimsk (harvesting operation) and three other lease-holding companies. The Ust-Ilimsk sawmill has been sold and is not included in the figures for 2012 and 2013. Ust-Ilimsk harvesting results have been excluded as the forestry assets have been rented out while the strategy for harvesting operations in the region is being revised. Magistralny includes Lesprom (harvesting operation) and RusForest Magistralny (sawmill).
- 2. There is a limited market for pulpwood inside Russia, and sales of pulplogs are not material for the Group. Therefore, pulpwood production and sales volumes are not presented in the table.

#### RusForest Group Harvesting Dynamics

The graph below shows harvesting of sawlogs in Arkhangelsk and Magistralny (continuing operations) and Boguchany (discontinued operations). April, May and June are seasonally low months in harvesting.

#### RusForest Group Sawmilling Dynamics

The graph below shows sawnwood production by Arkhangelsk and Magistralny (continuing operations) and Boguchany (discontinued operations) sawmills.

continuing operations
discontinued operations

## **Operational highlights & regional update**

#### Northwest Russia

#### Arkhangelsk

Arkhangelsk harvesting produced 26,937 m<sup>3</sup> of sawlogs in Q4 2013 compared to 34,055 m<sup>3</sup> in Q4 2012. Lower volumes were a result of suspending harvesting operations in unprofitable forest areas.

The Arkhangelsk sawmill (LDK-3) produced 31,664 m<sup>3</sup> of sawnwood in Q4 2013 compared to 31,611 m<sup>3</sup> in Q4 2012.

The local project team managed to build the pellet mill on schedule and successfully pass the testing phase. The first pellets are being stored in our two silos and are ready for the first shipment to European customers.

#### Eastern Siberia

#### Magistralny

Magistralny harvesting produced 92,952 m<sup>3</sup> of sawlogs in Q4 2013 compared to 65,157 m<sup>3</sup> in Q4 2012. Harvesting in forest lease areas controlled by third parties in Q4 2013 totaled 50,233 m<sup>3</sup> – more than half of total harvesting – in order to secure sawlogs suitable for Japanese production.

The Magistralny sawmill produced 20,806 m<sup>3</sup> of sawnwood in Q4 2013 compared to 15,453 m<sup>3</sup> in Q4 2012.

The average Magistralny sawnwood price increased by 31% from Q1 2013 to Q4 2013 due to a significant increase in sales to the premium Japanese market. In Q4 2013, sales to Japan constituted 21% of sawnwood sales compared to 1% in Q4 2012.

#### Ust-Ilimsk

Currently, the Ust-Ilimsk forest leases are rented out while the strategy for harvesting operations in the region is being revised. Additional rental agreements were entered into during Q4 2013 in order to ensure breakeven operations until the strategy review is finalized.

#### Boguchany

Boguchany harvesting produced 67,178 m<sup>3</sup> of sawlogs in Q4 2013 compared to 65,724 m<sup>3</sup> in Q4 2012.

The Boguchany sawmill produced 15,797 m<sup>3</sup> of sawnwood in Q4 2013 compared to 19,714 m<sup>3</sup> in Q4 2012. The lower volumes were a result of the late arrival of winter in Siberia. Sawlog hauling operations were suspended in November due to wet and muddy road conditions.

In Q1 2014, RusForest sold the Boguchany sawmill, Boguchansky LPK, for USD 8.0 million and agreed to sell the Boguchany harvesting company, RusForest Angara LLC, to the same buyer for USD 5.8 million. The sale of the harvesting company is expected to close on September 30, 2014.

#### EBITDA Analysis

The EBITDA loss from continued operations adjusted for non-recurring items is the best indicator of true earnings from regular operations. The EBITDA loss decreased by 83% in Q4 2013 at SEK 6.4 million compared to Q4 2012 at SEK 38.8 million. EBITDA loss from continued operations adjusted for non-recurring items decreased 62% for full year 2013 compared full year 2012. Magistralny showed good earnings for the second quarter in a row while Arkhangelsk was still negative due to the lack of a market for residual products in 2013. Ust-Ilimsk has leased out the majority of its forest leases to third parties while reviewing the strategy for harvesting operations in the area. In Q4 2013, Ust-Ilimsk did not quite achieve earnings neutrality through rent income, but additional rent agreements were concluded.

## Profit and loss statement

#### Revenue

In Q4 2013 sawlogs and sawnwood sales in m<sup>3</sup> from core operations (Arkhangelsk and Magistralny) were down 22% and 8% respectively compared to last year. However, due to a much higher price received for sawnwood in Q4 2013 compared to Q4 2012, revenue from sawnwood actually increased by 31% year-on-year from these operations. For the full year 2013 sawlogs and sawnwood sales in m<sup>3</sup> from core operations (Arkhangelsk and Magistralny) increased compared to 2012 and coupled with a higher sawnwood price and stable sawlog price that translated into an increase in revenue of 39% and 26% for sawnwood and sawlog respectively for these operations. Increase in price received for sawnwood in 2013 is mainly due to larger share of sales to premium Japanese market achieved, however, part of the increase in prices was attributable to the change in the pricing structure. Arkhangelsk sawmill started to deliver sawnwood using rented vessels. Therefore, both the price for sawnwood and the distribution cost increased in Q4 2013 compared with Q4 2012

Taking into account revenue from Ust-Ilimsk unit and other revenue, the Group's total revenue from continuing operations in Q4 2013 decreased by 10% compared to Q4 2012, explained by the downscaled Ust-Ilimsk operations in 2013, however, revenue for the full year 2013 was down only 2% compared to 2012 despite the Ust-Ilimsk reduction. Pulpwood and woodchip sales volumes were negligible due to the restructuring of Ust-Ilimsk and the collapse of pulp production in the northwest. 2012 revenues were restated to exclude discontinued operations.

	Sales volume (m3)	Average price (SEK)	Q4 2013 (SEKm)	Q4 2012 (SEKm)	Change
Sawnwood	46,005	1,624	74.7	56.9	31%

RusForest revenue breakdown (continuing operations)

Q4 2012

12M 2012

12 of 29

#### Costs

While revenue from continuing operations in Q4 2013 and for the full year 2013 was lower compared to previous year, RusForest's gross result improved from a gross loss of SEK 30.9 million in Q4 2012 to a gross profit of SEK 7.8 million in Q4 2013. The gross result for the full year 2013 improved to a gross profit of SEK 14.7 million from a gross loss of SEK 107.6 million in 2012. The improvement in Gross Result is achieved through lower costs of sales, main driver of lower cost of sales were efficiency improvements which translated into lower personnel costs, less purchased sawlogs because more harvested ourselves and general impact from phasing out the unprofitable Ust-Llimsk sawmill and planing mill operations. *See note 1 for detailed breakdown* 

Distribution expenses increased in Q4 2013 and for the full year 2013 compared to the same periods in the previous year. The main drivers of higher distribution costs were increased sea freight and railway costs as part of a shift in the structure of sales terms later in the delivery chain to the end client (i.e. to port of buyer from Arkhangelsk) and also due to increased rail transports to Japan from Magistralny. Such costs are however offset by higher prices received. See Note 2 for detailed breakdown

At the corporate level, RusForest managed to reduce overhead costs by 65% from SEK 19.6 million to SEK 6.9 million when comparing Q4 2012 to Q4 2013. Part of the large difference is explained by extraordinary items such as termination payments inflating the Q4 2012 costs. However, the Company has used less external consulting services and had lower headcount in Q4 2013 compared to Q4 2012. In addition, RusForest managed to optimize office rental costs both in Stockholm and in Moscow.

#### Impairments

In Q4 2013 an impairment loss of SEK 49.7 million was recognized in continuing operations. Out of the SEK 49.7 million, SEK 24.6 million was related to Arkhangelsk with the write-off of non-operational machinery and the value of non-core forest lease agreements to be cancelled. The remaining SEK 25.1 million relates to Ustllimsk and impairment of certain road structure investments, as well as old non-operational equipment.

Furthermore, the Boguchany business unit was classified as held for sale as of December 31, 2013 and therefore presented separately as discontinued operations. In connection with the reclassification of Boguchany an impairment loss of SEK 220.8 million is recognized under discontinued operations in Q4 2013. The Company's pellets mill in Ystad was also still held for sale as of December 31, 2013, and a further impairment of its value by SEK 9.3 million was recognized in Q4 2013 under discontinued operations.

#### Financial Income and Expenses

The financing cost of SEK 7.5 million includes interest on bank loans and financial leases. The cost was lower than in Q4 2012 due to the bond restructuring in Q1 2013 (refer to the Prospectus of February 2013 published on the Company's website).

#### Income Tax

The Group generated a deferred income tax credit on tax losses to be carried forward. The related gain was offset by a provision to bring deferred tax assets in line with deferred tax liabilities.

#### Net Result

The Group's net loss from continuing operations for Q4 2013 was SEK 89.4 million (Q4 2012: loss of SEK 384.7 million). Including loss after tax from discontinued operations the Groups total loss for the quarter amounted to SEK 355.0 million, compared to SEK 675.5 million in Q4 2012.

For the full year 2013 net result from continuing operations amounted to a profit of SEK 44.8 million compared to a loss of SEK 657.6 million in 2012. For the full year 2013 the Group's total loss including discontinued operations amounted to SEK 290.0 million, compared to loss of SEK 1,086.1 million in 2012.

### **Balance Sheet and Cash Flow**

In 2013, the consolidated balance sheet of RusForest was affected by several significant events.

Firstly, in Q1 2013, RusForest completed the restructuring transaction - refer to Q1 2013 report for details. The transaction had a significant effect on the equity and debt of RusForest:

- The shareholders contributed SEK 186.5 million in cash before issue costs of SEK 22.1 million;
- Approximately 50% of the bond payable as of December 31, 2012, was set-off as payment for newly
  issued shares in the debt-to-equity swap, and the remaining 50% was recognized as a gain from the bond
  restructuring in the income statement; RusForest accrued interest on the bond up to January 25, 2013;
- These steps all together strengthened RusForest's share capital by approximately SEK 450 million before issue costs and reduced the net debt-to-equity ratio to 29% at December 31, 2013 from 167% at December 31, 2012.

Secondly, during 2013 the Company sold several non-core assets, including the Ust-Ilimsk sawmill, Tuba forest leases in Ust-Ilimsk for aggregate amount of RUB 82 million (SEK 16.4 million), the Shenkursk sawmill for USD 1 million (SEK 6.5 million), the gravel quarry (Belomorski Karier), the planing mills in Ust-Ilimsk (UIZSI) and Arkhangelsk (ALK), and the pellets operation in Latvia for EUR 375,000 (SEK 3.3 million). RusForest classified the remaining non-core assets as held for sale at December 31, 2013.

The main non-core asset held for sale at December 31, 2013, was the Boguchany operating segment in Eastern Siberia. RusForest impaired the carrying amount of the Boguchany segment with SEK 220.8 million in Q4 2013In addition, the Ystad pellet plant was still for sale at December 31, 2013 and its value was also impaired by SEK 9.3 million in Q4 2013. It should be noted that the buyer of the gravel quarry failed to meet its' obligations under the share purchase agreement signed in April 2013. In Q4 2013, the Company created a provision for doubtful debt of SEK 17 million while taking necessary legal measures to collect the receivable.

Sales of non-core assets and the reclassification of the Boguchany segment to an asset held for sale in Q4 2013 led to a reduction in almost all of the balance sheet line items when comparing balances at the end of 2013 and end of 2012.

Thirdly, in Q2 2013, RusForest started construction of a 100,000 tons/year pellet mill in Arkhangelsk primarily using bank financing. As of December 31, 2013, RusForest had drawn approximately SEK 70 million from Centro Credit bank and invested in total about SEK 99.1 for the pellet mill construction.

Interest bearing obligations at December 31, 2013, included local bank borrowings, the liabilities under finance lease contracts and the loan payable to Vostok Nafta Investments Ltd of USD 5 million.

## **Market Outlook**

#### **North America**

#### Construction

The US housing starts in December were up 4.0% year on year, moderate in comparison to the 18.3% growth for the year. Single-family starts were up 11.0% year on year (15.4% year to date), while multifamily starts were down 6.8% year-on-year in December, but up 24.5% year to date. December's downturn may have been linked to winter weather, but permits, a leading indicator of starts - have been leveling off for much of 2013. Negative headlines leading up to the US government shutdown could have been part of the reason for the slowdown in permits at the end of 2013.

The growth in residential construction was the largest driver of overall US sawnwood demand in 2013, and will continue to be for a number of years ahead. However, residential construction was not the largest segment of demand;, it was instead repair and remodeling (R&R). Despite growth in US housing starts in 2014, the largest segment for sawnwood demand in 2014 will again be R&R.

#### Sawnwood

Increased sawnwood consumption in the US during 2013 has resulted in expanding domestic production and rising sawnwood imports.

Total production in North America was up almost 6% in 2013 compared with 2012, and imports from Canada and overseas increased by18%.

Sawnwood production levels in the US and Canada have gradually gone up since 2009, and sawnwood shipments are currently back up to the same levels as in 2008, just after the beginning of the global financial crisis.

Sawnwood prices in Q4 remained high and prices at the end of the period regained much of what they lost in early December.

#### Europe

#### Construction

European housing markets remain in a state of disarray and European softwood sawnwood consumption continues to languish. The UNECE report for Europe forecasts a 2.5% increase in consumption in 2014, after declining by 1.1% in 2013. Out of the 12 largest softwood sawnwood-consuming countries in Europe (representing 83% of consumption for 31 nations), half of them have shown declining building permits based on Eurostat data indexed to 2010.

Overall, the direction of the EU 28 residential construction was essentially flat in 2013. However, there were exceptions, countries of strength include Germany and the UK (the largest and third-largest softwood consumers in the EU, respectively). On the other hand, the second-largest consumer, France, declined building permits.

#### Sawnwood

Higher consumption figures are predicted for the UK, Italy, and Austria. The brisker pace of building activity in the UK for a number of months now will probably continue during 2014 and thereby lead to a rise of roughly 2.7% in sawnwood consumption in 2014 to 8.1 million m<sup>3</sup>.

European sawnwood exporters benefited from strong demand in China and Japan this year. Chinese imports of Finnish and Swedish sawnwood were up 218% year to date as of October 2013. Strong (and volatile) sawnwood prices in North America will open doors for European exporters, particularly in Asia. The export business in Africa and the Middle East remains challenged for the time being.

#### Japan

#### Construction

Japanese housing starts data paints a positive picture for wood consumption. The chart below shows that both non-wood and wooden housing starts are increasing, but wooden starts have actually made a full recovery to 2006–2007 levels, driven by a similar recovery in single-family starts. The outlook for Japanese demand is not clear given that Prime Minister Abe has indicated that additional stimulus may come later this year, possibly offsetting the negatives stemming from the tax increase.

Total housing starts for 2013 amounted to 980,025 units, up 11% from the previous year, which is the second largest level for the last 6 years following 1,093,000 units in 2008, while wooden starts actually higher than in 2008.

Housing Starts in Japan	2008	2009	2010	2011	2012	2013
Total, 1,000	1,093	788	813	834	883	980
incl. wooden	517	430	460	465	487	550

#### Sawnwood

Higher US market prices and a rise in Japanese demand combined boosted imported sawnwood prices early in 2013, and then keep them there. Japanese sawnwood demand grew as motivated consumers made purchases ahead of a consumption tax increase scheduled for April 2014. Another contributor to demand was the ongoing rebuild of natural disaster-hit areas of 2011. Despite a weakened yen, prices have remained stable.

According to preliminary data Japanese sawnwood imports in 2013 grew up by 11.3% compared to 2012. Deliveries from Russia increased by 15.5% (886,200 m<sup>3</sup> in 2013 compared to 767,400 m<sup>3</sup> in 2012).

### China

#### Construction

Chinese construction activity made a full recovery in 2013, reaching an all-time high. Residential starts grew by 11.6%, almost offsetting the decline of 11.2% in 2012. Other types of starts (offices, commercial space etc.) accelerated, with 18.8% growth in 2013. These figures do not include the social housing units the Chinese government has been building to increase the supply of affordable housing; announced a few years ago, the program was for 36 million units to be built between 2011 and 2015. As of November, China started construction of 6.7 million social housing units in 2013, with 5.4 million completed.

While the economic outlook for China appears to have downside risk for 2014, government policy for urbanization remains steadfast. The social housing program for this year has a target of more than 6.0 million starts, with 4.8 million to be completed by year-end. Furthermore, during a central working committee session, the government acknowledged that its efforts to instill affordability back into China's housing market via measures to slow demand have not worked. Therefore, new policies will be designed to increase supply as an alternate way to tackle China's housing problem.

#### Sawnwood

Chinese softwood sawnwood imports continue to grow, and the peak level of 14.9 million m<sup>3</sup> achieved in 2011 have been surpassed in 2013 at near 16 million m<sup>3</sup>.

China's sawnwood imports were 10%-11% higher in 2013 than 2012 (about 22 million m<sup>3</sup>).

According to preliminary data Russian sawnwood exports to China grew up by 10% in 2013 and surpassed Canadian exports to China (-5%). Russian sawnwood exports to China have more than tripled in the last five years. China's harvest decreased by 5%–10% in 2013 and is expected to drop further in 2014. As such, import demand should continue to be supported in 2014, particularly for softwood species.

Europe

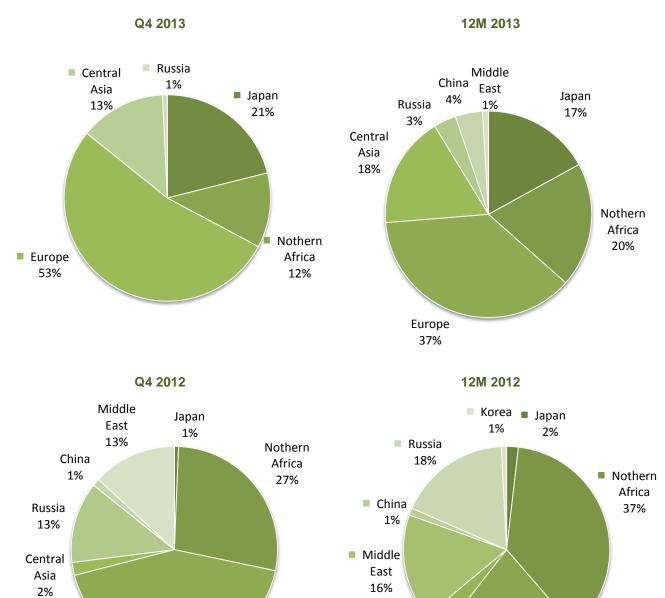

43%

#### **RusForest's market activity**

In 2013 RusForest shifted its customer base away from low-priced commodity markets, towards higher priced, specialty product markets, especially in Japan and Europe.

The following pie charts show the change in RusForest's sawnwood markets during 2013. The Middle East and North Africa have become much smaller markets, while Japan, Europe and Central Asia have become much larger. These market changes are key steps in increasing the Company's price realizations.

According to preliminary statistics, RusForest ranked sixth among Russian sawnwood exporters to Japan in 2013, with a share of 3.4%.

## **The Share**

ISIN: SE0001732728 Short name on NASDAQ OMX First North: RUSF Number of shares at December 31, 2013: 132,033,881

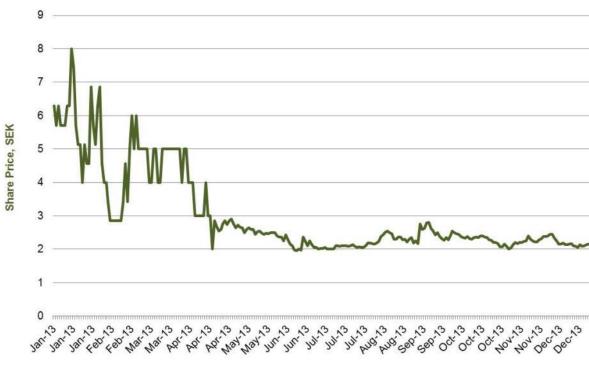

The RusForest AB share is listed on NASDAQ OMX First North Stockholm. At the close of the period, the share price was SEK 2.13 and the Company's market capitalization was approximately SEK 281 million. As of March 28, 2014, the share price was SEK 1.80 and the market capitalization was approximately SEK 237 million. The Company's certified adviser on First North is Pareto Securities AB, which also acts as a market maker in the RusForest share.

More details about RusForest can be found in the Company's Annual Report 2012, the Prospectus of February 2013 and on the Company's website at www.rusforest.com.

#### Major Shareholders at December 31, 2013

#### Trading data, 2013 (adjusted for the reverse share split in April 2013)

## Accounting policies

The interim report has been prepared in accordance with IAS 34 Interim Financial Reporting and related parts of the Annual Accounts Act. The interim report for the Parent Company has been prepared in accordance with the Annual Accounts Act chapter 9 except that it has not been prepared in the Swedish language. The Group and Parent Company have applied the same accounting and valuation principles as in the most recent Annual Report.

## **Qualitative and Quantitative Disclosures and Market Risks**

The Group's risk factors are described in detail in the prospectus published in February 2013 and the Annual Report 2012 published in April 2013. In addition, it should be noted that since RusForest was insolvent at the time of the bond restructuring in Q1 2013, the gain recognized in respect of the bond restructuring has been considered tax-exempt and prior years' losses carried forward in the Parent Company of SEK 70.7 million have consequently been lost. As the case law regarding when a company is considered to be insolvent is not fully clear, there is a remote risk that this may be interpreted differently by the tax authorities.

#### Note 4. Segment information

The Group's Parent Company has a head office in Stockholm, Sweden. All of the Group's operating companies are located in the Russian Federation.

Starting from Q1 2013, it has been decided to monitor and present performance of the operations based on geographical division of production units among Arkhangelsk, Ust-Ilimsk and Magistralny. As of December 31, 2013, two units are recorded as assets held for sale - Boguchany and Ystad pellets. The financial results of the management company, the trading house and the parent holding companies (RusForest AB, Varyag Capital Ltd, Varyag Finance GmbH and RusForest Bermuda) are not included in any of the operating segments and presented as unallocated. Previously, RusForest divided operations into harvesting and sawmilling.

There were no material intersegment transactions or revenue.

#### Operational segments, results for twelve months ended December 31, 2013
