

Nederman receives order worth SEK 20 million.

Nederman has received an order of two complete gas turbine inlet air filtration systems. The inlet systems will be installed on new turbines used for electric power generation in the USA. The order is worth SEK 20 million.

The Nederman systems include a pulse jet self-cleaning cartridge filters and will reduce ambient outdoor dust to a level sufficient to protect the turbine compressor and internal components.

The order is booked in the first quarter of 2014 and delivery of both inlet systems is expected to start in the first half of 2014 and be finished during 2015.
