IT – Genium INET 4.0220 EXT4 Maintenance

Maintenance update: Genium INET External Test System 4 (EXT4) will be down for a full day on April 23rd for migration of reference data from production. EXT4 will be available again for logons April 24th. All users and participants will remain but clearing account structure will be migrated from production. Due to this all historical trades and positions will be flushed.

NASDAQ OMX Front-end applications Clearing Workstation 1 and Trading Workstation are available for download on Genium INET 4.0220 website

<http://www.nasdaqomx.com/transactions/technicalinformation/geniuminet/enhancements/genium-inet-4.0220>

Members using Clearing Workstation 1 (CW1) are advised to renew the CW1 database with the -renewdb command on April 24th. Please see Clearing Workstation installation guide for more information.
