

## Sercel receives another order for a 508<sup>XT</sup> acquisition system

Paris, France – 19 June 2014

CGG announced today that, in addition to the first two 508<sup>XT</sup> systems being delivered to the industry this month, Sercel has also sold a system to PanAmerican Geophysical\* for delivery in July.

The Sercel 508<sup>XT</sup> is the latest addition to a long line of innovative Sercel systems. Its groundbreaking X-Tech<sup>TM</sup> architecture allows it to combine the benefits of both cable and cable-free systems in a single platform.

Dave Pratt, Chairman, PanAmerican, said: "We are excited to be the first to deploy the 508<sup>XT</sup> in North America, having chosen the system based on its unique features which will allow us to achieve the highest levels of production while greatly reducing the number of batteries that need to be deployed and maintained. We know that we can also count on Sercel for the very best support in the field."

Pascal Rouiller, CEO, Sercel, said: "This new sale is confirmation that the new paradigm being created by the 508<sup>XT</sup> is answering the needs of our clients. PanAmerican is a valued customer that is already familiar with our products and services. We look forward to working together with them now and in the future."

\*PanAmerican Geophysical is an international geophysical contractor with operations worldwide and offices in the UK, Canada & Argentina.

## About CGG

CGG (www.cgg.com) is a fully integrated Geoscience company providing leading geological, geophysical and reservoir capabilities to its broad base of customers primarily from the global oil and gas industry.
