Alfa Laval wins SEK 50 million oil and gas order in the UK

Alfa Laval – a world leader in heat transfer, centrifugal separation and fluid handling – has won an order to supply compact heat exchangers to an offshore platform in the UK. The order is worth approximately SEK 50 million and delivery is scheduled for 2014.

The Alfa Laval heat exchangers will be used for various duties, such as cooling, heating and condensation, in the processing of heavy crude oil on board the platform.

“This is another large order from the oil and gas offshore sector and this time it includes equipment for a platform located in the UK part of the North Sea. Yet another order that confirms our strong position as a reliable supplier to this industry,” says Lars Renström, President and CEO of the Alfa Laval Group.

The order is booked in the Energy & Process segment of the Process Technology division. With the previous organization it would have been booked in the Energy & Environment segment.

Did you know that... Alfa Laval has provided compact heat exchangers to the North Sea oil platforms since the 70's?

About Alfa Laval

Alfa Laval is a leading global provider of specialized products and engineering solutions based on its key technologies of heat transfer, separation and fluid handling.

The company's equipment, systems and services are dedicated to assisting customers in optimizing the performance of their processes. The solutions help them to heat, cool, separate and transport products in industries that produce food and beverages, chemicals and petrochemicals, pharmaceuticals, starch, sugar and ethanol.
