Odense, 26th of february 2008

The bank has returned a very satisfactory core income result before provisions of DKK 411 million. This is an increase of 34 percent on the previous year (without the sale of Totalkredit).

The before-tax profit was DKK 315 million, in line with the forecast figure of DKK 330 million that remained unchanged throughout the year. This represents an average return on equity of 16 percent.

- 34 percent growth in core income, broken down as follows: core income excluding trading income of DKK 648 million, 13 percent up on the previous year, and trading income of DKK 328 million, representing an increase of 34 percent
- Growth of 23 percent in loans, and 24 percent in deposits
- Costs of DKK 569 million, 11 percent up on the previous year
- Provisions on loans of DKK 71 million, as against provisions of DKK 39 million posted to income in the previous year
- Negative result on holdings, of DKK 25 million, following last year's positive result of DKK 19 million

Provisions on loans were up on the previous year, and the profit on holdings was lower than expected. The beforetax profit was kept in line with the bank's forecasts thanks to the excellent growth in core earnings.

The return on shares for 2007 was 11 percent.

Fionia Bank received the following highly satisfactory ratings from Moody's: financial strength C, long-term deposit A1 and short-term deposit P-1.

The bank's investment in strengthening customer advisory services, building up the overall skill base and recruiting more staff with specialist skills contributed to the excellent core result. The recruitment of new staff resulted in a net increase of 48 employees, and at year end, the bank employed a total of 633 staff (in full-time equivalents).

We have recently decided to carry out major changes to the bank's organisational structure. The focus on our skill base will be further reinforced, and a segment-based structure will be implemented. The bank's competitive position will be enhanced by establishing new competence centres, to deliver better services for customers, and to generate growth and higher profitability for the bank.

The focus in 2008 will therefore be not only on consolidation and optimisation, but also on deriving tangible benefits from our investments in staff and skills development.

Lower growth is expected for the Danish economy as a whole in 2008, which will impact on the level of growth in the bank's business volume and activity levels.

Core earnings, excluding trading earnings, is therefore likely to be affected by lower growth in both loans and deposits. We expect to be able to maintain trading earnings at the current high level, on the basis of significantly increased efforts in this area. Earnings will however be dependent on performance trends on the financial markets.

The forecasted core result before provisions for 2008 is DKK 370-400 million.

Provisions are expected to be on a par with the 2007 figure.

The profit on holdings will depend on the performance of the financial markets, but the bank expects a positive return in 2008.

Announcement of annual financial statements for 2007 – Fionia Bank A/S Group

This increase is based on higher returns on the bank's equity and increased activity volumes for all customer categories. For the trading component, the increase refers to the results in the first half of 2007.

Activity volumes fell off in the second half of the year, owing to the difficult conditions on the financial markets.

Trading earnings excluding Totalkredit also includes the bank's portfolio of unlisted shares recognised at fair value on the basis of model calculations. These delivered a capital gain of DKK 27.6 million in comparison with the previous year, including dividends and after funding costs.

Total	-24,7	19,2
Costs	4,2	5,8
Income on holdings	-20,5	25,0
(DKK million)	2007	2006

The result was affected by rising interest rates and the crisis on the financial market in the second half of 2007, and also by a downward price adjustment of our holding of structured credit products, with a high external rating. The negative impact from our bonds holdings was partly offset by a positive result on the equities market, with returns significantly outperforming an equivalent passive investment strategy.

After-tax profit

The after-tax profit was DKK 243.8 million, resulting in a net asset value per share of DKK 1,117.

Tax provisions for the period were DKK 71.4 million, equivalent to an actual tax rate of 22.7 percent. DKK 62.2 million of this amount is the tax calculated on income for the year, with DKK 8.0 million for deferred tax adjustments.
