Nexam's patent application regarding nylon resins containing MEPA approved in Japan.

Nexam has received a notice of allowance from the Japanese Patent Office stating that it intends to grant Nexam's Japanese patent application regarding cross-linkable nylon resins containing Nexam's unique crosslinker MEPA.

MEPA is a unique molecule that improves nylons, polyesters and other polymers. Nexam developed MEPA with the aim of getting a crosslinker specifically suitable for engineering plastics with melting points in the range between 200 and 270 degrees, which comprises the majority. Global production of plastics where MEPA can be used comprises more than 3 million tons / year (corresponding to total sales of more than USD 12 billion).

The uses for these engineering plastics are many. E.g. nylons are used in a variety of applications, such as components for the transportation, automotive, electrical and electronics industry. Based on Nexam's technology for crosslinking thermoplastics properties such as service life, heat resistance, mechanical strength and chemical resistance are improved significantly. In addition it also increases the possibility of replacing metals, and more expensive plastics, with plastics modified by Nexam's crosslinkers.

The granting of the application in Japan will further strengthen Nexam's protection for the crosslinking technology developed by the company.

"This will be Nexam's first granted patent in Japan. The market for nylons is relatively large in Japan, which makes us judge this patent as valuable for the company going forward.", says Daniel Röme, Director of Business Development and Innovation.

Nexam currently has 8 approved patents and 36 ongoing patent applications within 12 patent families.

Nexam is a Swedish company with a world-leading technology within its area for heat-activated crosslinking of plastics and polymers. The company develops, manufactures and markets unique heat-activated crosslinkers to the plastics market. A company description and more information about the business will be found on www.nexam.se. The company's Certified Adviser is Remium Nordic AB.
