

IT Notice 78/14

Genium INET – Index Dividend Futures in External Test 3

In preparation for a product launch later in 2014-Q4, OMXS30 index dividend futures are now available in External Test 3. Tradable futures series are available on the new underlying index OMXS30DVP (ISIN SE0004270494) with the below OMnet API & interface file codes. The codes will be the same also in External Test 1 and the production system.

Please note that the availability for clearing tests in External Test 1 as well as the production launch date will be communicated separately at a later stage.
