Profit before taxes amounted to 34 thous.EUR in 6 months period of 2014. Profit after taxes amounts to 2 thous.EUR.

Commodity output is estimated in the amount of 3 987 thous.EUR. The result of 6 months of 2014 is by 915 thous.EUR higher than in the relevant period of previous year.

At present the company exports 91% of its products to the East and West: among them 64% eastwards and 27% westwards; 9% of products are sold on domestic market.

The average statistical number of employees of JSC "Ditton pievadķēžu rūpnīca" was 304 employees in 6 months of year 2014.

The average salary amounted to 495 EUR in 6 months period of 2014, which is by 105 EUR more than in 6 months of 2013.

Significant events. Market tendencies and development of the company.

Risks.

Having analyzed the Company's operating conditions, performance and market situation in six months of 2014, the Company's management believes that information set out before in the management report to the annual report for 2013 is fully up to date and relevant for the reporting period, and still notes that in the field of metal processing and machine building there are no increasing trends observed in the sector represented by the Company, which is also reflected in the Company's performance indices for the reporting period.

In the opinion of the management in the industrial production sector represented by the Company the reporting period still has been characterized by stagnation and lack of production growth, which previously has been defined by market analysts as "the second wave of the crisis", which becomes apparent not so much as a catastrophic or sharp decline, but more as the lack of activity. So, for instance, a certain stagnation could be observed in the Eastern market sector (RF) represented by the Company where upon the end of government support programs production volumes in the field of metal processing and machine building decreased. In substantiation of these conditions the Company refers to the report of the Industry, Research and Energy Committee of the European Parliament from November 15, 2013 "CARS 2020: Action Plan for a competitive and sustainable automotive industry in Europe" 2013/2062 (INI)), where the situation in the automotive market is analyzed, and addressing this issue at EU level refers to its overall relevance and importance. The Management Board focused on these circumstances in its previous management reports, making a moderately optimistic or pessimistic forecasts for its performance, and these forecasts, evaluation of the activity in different market segments as well as information about other negative factors affecting the Company's remain relevant even now.

JSC "DITTON PIEVADKEZU RUPNICA"
FINANCIAL REPORT FOR 6 MONTHS OF 2014

Furthermore, several European sources - mass media, automotive research centers (e.g. CAR) and research companies (e.g. Inovev) report on the anticipated closure of some automotive companies and the general decline in the branch. The Russian Federation automaker AvtoVAZ also reports on reduction of automobile production volume. This is due to the slowdown in economic activity resulting in a cautious behavior of consumers and putting off larger purchases such as a car. On the background of lack of the overall economic growth as evidenced by the minimum growth rates of both European and Russian GDP, the demand for the Company's industrial chains do not indicate an increase in this sector either.

Thus, taking into account that the Company as the supplier to the first-tire and second-tier component suppliers of the automotive manufacturers is fully integrated into the global economy, its activity, efficiency and performance is directly dependent on the general market situation, economic developments and political decisions as well.

Subject to the above conditions, and the current situation where economy of Europe and other states is directly affected by the mutual economic sanctions of the European Union and the Russian Federation due to the Russian-Ukrainian crisis and there is no probability excluded that they will not be imposed also in other braches like shipbuilding, mechanical engineering and other as reported, for example, by the European Business Association, the Company refrains from making optimistic forecasts in respect of the growth of its production volumes and performance indicators. In the present circumstances the Company is looking at the existing market trends with caution, and like both Latvian and foreign companies, which regardless of their will are involved in these processes, hopes that relations of the European Union and the Russian Federation can be settled by diplomatic means, without harming business and the economy of the one or the other party.

Taken together, the Company closed the reporting period with positive earnings.
