# Rejlers is engaged by Elverket in Vallentuna

**Rejlers Energitjänster has received an order from Elverket Vallentuna Elnät to deliver a number of services in the field of energy metering. The order value is around SEK 2.7 million and stretches over the next three years.**

The order includes collecting and managing all the measured values of the existing collection system at Elverket. Reporting and billing will be made to the market actors. Rejlers Energitjänster will also manage the entire change of the supplier process. When a customer is changing their electricity supplier or is moving to another address, information on personal and system data will be shared with participants of different systems in a structured manner. Reporting and monitoring of losses in the network are also part of the assignment.

**In brief**

Elverket Vallentuna AB creates profitable growth through attractive customer offerings. The subsidiary Elverket Vallentuna El AB markets and sells electricity on the deregulated market and has customers throughout Sweden. The subsidiary Elverket Vallentuna Elnät AB owns and operates the electricity distribution network in the county of Vallentuna and ensures that all households, businesses and other activities have a safe and secure supply of electricity. The subsidiary Elverket Entreprenad AB provides new construction, service and maintenance of electrical grids and installations. The parent company Elverket Vallentuna AB is a public company and was listed on Aktietorget in 2002.
