

TagMaster becoming partner with Axis

Stockholm, Sweden, September 25, 2014

TagMaster, the leading producer of advanced RFID products for long range vehicle identification in Traffic Solutions and Rail Solutions, integrate its new reader family, XT-series, with Axis newly launched AXIS A1001 Network Door Controller. The integration of TagMaster XT-series and AXIS A1001 offers a complete physical access control system, including external gates and parking facilities.

The XT-1 Long Range solution from Tagmaster can be integrated into existing access control and facility management software and connected to AXIS A1001 to create a scalable future-proof solution. The intuitive ready-made configuration menu in XT-1 integrates in a few minutes with the A1001 Network Door Controller.

The TagMaster XT-1 reader is designed with a unique combination of high quality components and competitive price, which makes the XT-1 the most innovative reader in the market. The unique DNA of TagMaster products is characterized of long read range, long product life time and low cost of use. Its weatherproof design, with IP66 rating, ensures that the reader is an excellent choice for outdoor use as well as for indoor use.

The XT-1 is an "All in One" reader with integrated antenna which makes it easy and quick to install. The built in Ethernet switch makes it easy to connect multiple readers ,makes it possibly to use software for multi-lane analysis and antipassback functionality.

The XT-1 includes TagMaster´s SecureMarkID ID-tag format, which is developed to ensure that each UHF ID-tag has a unique identity, provides the highest level of security.

"TagMaster is pleased and excited being part of Axis ecosystem and becoming a new technology partner. Axis has a strong partner network around the globe that we will be able to approach and we expect that this partnership will help us grow our business in medium to long term," said Jonas Svensson, CEO, TagMaster
