**Talvivaara Mining Company Plc**

Talvivaara Mining Company is an internationally significant base metals producer with its primary focus on nickel and zinc using a technology known as bioheap leaching to extract metals out of ore. Bioheap leaching makes extraction of metals from low grade ore economically viable. The Talvivaara deposits comprise one of the largest known sulphide nickel resources in Europe. The ore body is estimated to support anticipated production for several decades. Talvivaara has secured a 10-year off-take agreement for 100 per cent of its main output of nickel and cobalt to Norilsk Nickel and entered into a long-term zinc streaming agreement with Nyrstar. Talvivaara is listed on NASDAQ Helsinki. Further information can be found at [www.talvivaara.com](http://www.talvivaara.com).
