Cybercom strengthen Sida in the Connected World

The Swedish International Development Cooperation Agency, Sida, has signed a new framework agreement with Cybercom. The agreement runs for up to four years and covers IT Governance, IT Architecture and Base Platforms.

“The Swedish International Development Cooperation Agency, Sida, is a government agency working on behalf of the Swedish parliament and government, with the mission to reduce poverty in the world. Through its work and in cooperation with others, it contributes to implementing Sweden’s Policy for Global Development. We are very proud to be participating in this responsible work,” says Niklas Flyborg, President and CEO, Cybercom Group.

The framework agreement was procured in four areas. One provider was appointed per area in very tough competition. Cybercom was awarded three of these four areas. IT Governance, IT Architecture and Base Platforms. The framework agreement is valid for up to four years and is calculated in total to represent an order value of SEK 6 million annually.

“The agreement is particularly gratifying because it means that we can now work closely with Sida in these selected areas over a prolonged period. They are an important client, and we have previously collaborated on a number of projects. They know to draw benefit from digitalisation and the connected world in order to strengthen and facilitate their work,” says Pär Abelson, Business Segment Manager, Public Sector at Cybercom.
