## President and CEO Pekka Lundmark

"Our result continued to develop in the right direction in the third quarter. As in the previous quarter, our operating profit improved in spite of lower sales. Unfortunately, we are behind last year in sales by EUR 115 million after three quarters, but the cumulative operating profit excluding restructuring costs is very close to that of 2013. The year has been uneven between our two businesses. Service business continued its steady profitability improvement. We have every reason to be pleased with the $11 \%$ operating margin in the quarter. The equipment business coped reasonably with the lack of volume and produced a decent result, albeit still behind our targets.

We target growth in both equipment and service businesses, but it seems that we cannot expect much help from the general market conditions. We are working on both our product portfolio and the efficiency of our operations, especially in the equipment business. We are renewing our offering for both advanced and standard customer needs in all product and service categories. Two important products for the standard need segment, a new industrial crane model and a new wire rope hoist were launched during the quarter, and there is more to come. We are also simplifying our operational model in the equipment business to add clarity and to enable further improvements in cost efficiency."

## MARKET REVIEW

In terms of the macroeconomic data for the first nine months of 2014, developed countries outperformed emerging countries. American factory output, measured by the Purchasing Managers' Index (PMI), continued in the expansive territory. The U.S. manufacturing capacity utilization rate continued to increase as well.

According to the PMI surveys in the Europe, the Janu-ary-June 2014 manufacturing activity was upbeat following the turnaround in mid-2013. However, the European PMIs lost momentum in the third quarter. Overall, the UK was the brightest spot, while France was the weakest of the large countries in the survey. The manufacturing capacity utilization in the European Union was above the previous year's corresponding period in January-September.

The Purchasing Managers' Indexes in Brazil, China and Russia pointed to stable manufacturing output, while the signs of moderate growth could be observed in India.

Overall, the activity in the world's manufacturing sector, according to the aggregated JPMorgan Global Manufacturing PMI, continued to increase at moderate pace in January-September 2014.

In a year-on-year comparison, the demand for cranes and hoists weakened among industrial customers on a global basis. However, the demand improved somewhat in the course of the year compared to the beginning of 2014. Overall, the demand for heavy-duty cranes continued to suffer from the low investment activity within the process industries. Demand for lift trucks was strong in EMEA and the Americas.

The global container traffic grew by approximately 4 percent in January-September 2014. The project activity with container ports was satisfactory. The most active markets in terms of orders received were North America, Eastern Europe, Turkey, Indonesia and Australia.

The demand for lifting equipment services and parts grew moderately. The demand in North America recovered after the first quarter, which was somewhat held back by the adverse weather conditions. Demand in Europe was stable.

Compared to the previous year, the steel price was stable, while the copper price continued its downward trend. In January-June, the EUR strengthened moderately against the USD in the year-on-year comparison. However, this development was clearly reversed in the third quarter and the EUR recorded its year-to-date low against the USD at the end of September.

Note: Unless otherwise stated, the figures in brackets in the sections below refer to the same period in the previous year.

January-September orders received totaled EUR 917.5 million $(1,039.3)$ showing a decrease of 11.7 percent. Orders grew in EMEA, but fell in the Americas and APAC. Orders for industrial cranes accounted for approximately 40 percent of the orders received and were lower than a year ago. Components and light lifting systems generated approximately 25 percent of the new orders and were below last year's level. The combined orders for port cranes and lift trucks amounted to approximately 35 percent of the orders received and were lower than a year ago.

The order book increased by 1.3 percent to EUR 860.0 million (849.0) from a year before, but was 0.6 percent lower than the end-June 2014. Sales fell by 12.4 percent to EUR 844.6 million (964.3). The operating profit, excluding restructuring costs of EUR 0.3 million (15.5), was EUR 26.1 million (37.1) and the operating margin 3.1 percent (3.8). Operating profit including restructuring costs was EUR 25.9 million (21.6) and 3.1 percent of the sales (2.2). The Equipment operating margin excluding restructuring costs was affected by the sales decrease. In addition, Business Area Equipment incurred costs of approximately EUR 3 million, the majority
of which was booked in the first quarter, due to depreciation of the Ukrainian Hryvnia and transfers of production from Ukraine. On the other hand, sales mix contributed positively to the operating margin in Equipment.

The third-quarter order intake fell by 0.9 percent and totaled EUR 274.0 million (276.6). Orders received rose in EMEA, but fell in the Americas, mainly due to lower port crane orders. Asia-Pacific orders were stable. Compared to the previous year, orders for industrial cranes and lift trucks rose whereas orders for crane components, light lifting systems and port cranes fell from the previous year.

The third-quarter sales totaled EUR 295.1 million (320.3) and were 7.9 percent lower than a year ago. The operating profit, excluding restructuring costs of EUR 0.0 million (11.2), was EUR 13.6 million (16.3) and the operating margin 4.6 percent (5.1). Third-quarter operating profit including restructuring costs was EUR 13.6 million (5.1), and the operating margin 4.6 percent (1.6). The Equipment operating margin excluding restructuring costs fell due to the lower sales. On the other hand, it was supported by improved project execution and sales mix.

## Group Overheads

Unallocated Group overhead costs and eliminations were EUR -11.9 million ( -18.0 ) in the reporting period representing 0.8 percent of sales (1.2). These included restructuring costs of EUR 0.0 million (1.6).

## RESEARCH AND DEVELOPMENT

Konecranes' key strategic initiative "Segment-based offering" (previously: "Emerging markets offering") has made significant progress in 2014. Within this strategy, we meet our customers' needs through a segment-based offering consisting of both standard and advanced products and services.

In April, Konecranes introduced the BOXHUNTER container handling crane. The product is a completely new type of rubber-tired gantry (RTG) crane as it contains radical innovations, such as the cabin and machinery at the ground level, lighter hoisting trolley and counterweights to improve eco-efficiency. The BOXHUNTER is entirely modular and is delivered as a regular container shipment.

Early in September, Konecranes launched an entirely new family of wire rope hoists under its Morris Crane Systems power brand in China. Morris S5 Series features a flexible trolley concept that permits hoist installation on all popular single girders, making it a perfect product for the replacement market too.

Later in September, Konecranes introduced a new overhead crane, the CXT ${ }^{\circledR}$ UNO. The CXT UNO is primarily intended for companies operating in manufacturing, construction, and logistics. The CXT UNO combines a strong range of features based on a simpler set of components and technical solutions compared to existing CXT products. This simpler design, together with easy access to spare parts, means that the CXT UNO will be easy to maintain. Following the initial rollout in India, the plan is to introduce the CXT UNO in other countries in the near future.

## RISKS AND UNCERTAINTIES

Konecranes operates in emerging countries that entail political, economic, and regulatory uncertainties. Adverse changes in the operating environment of these countries may result in currency losses, elevated delivery costs, or loss of assets. The operations in emerging countries have had a negative impact on the aging structure of accounts receivable, and may increase credit losses or the need for higher provisions for doubtful accounts.

Konecranes has made several acquisitions and expanded organically into the new countries. A failure to integrate the acquired business or grow newly established operations may result in an impairment of goodwill and other assets.

One of the key strategic initiatives of Konecranes is oneKONECRANES. This initiative involves a major capital expenditure for the information systems. Higher-thanexpected development or implementation costs, or a failure to extract business benefits from the new processes and systems may lead to an impairment of assets or decrease in profitability.

Konecranes delivers projects in its Industrial Crane Solutions and Port Cranes business units, which involve the risks related to, for example, engineering and project execution. A failure to plan or manage these projects may lead to higher-than-estimated costs or disputes with customers.

Challenges in financing may force customers to postpone projects or even to cancel the existing orders. Konecranes intends to avoid incurring costs of major projects under construction in excess of advance payments. However, it is possible that the cost-related commitments in some projects temporarily exceed the amount of advance payments.

The Group's other risks are presented in the Annual Report.

## MARKET OUTLOOK

European customers have become increasingly cautious about investing. The Purchasing Managers' Indexes are giving a reason for the continued optimism regarding the U.S. market. The near-term market outlook in emerging markets still remains uncertain. Continued contract base growth bodes well for the future of the service business.

## Contingent liabilities relating to litigation

Various legal actions, claims and other proceedings are pending against the Group in various countries. These actions, claims and other proceedings are typical for this industry and consistent with a global business offering that encompasses a wide range of products and services. These matters involve contractual disputes, warranty claims, product liability (including design defects, manufacturing defects, failure to warn and asbestos legacy), employment, vehicles and other matters involving claims of general liabilit.

While the final outcome of these matters cannot be predicted with certainty, Konecranes is of the opinion, based on the information available to date and considering the grounds presented for such claims, the available insurance coverage and the reserves made, that the outcome of such actions, claims and other proceedings, if unfavorable, would not have a material, adverse impact on the financial condition of the Group.

## FINANCIAL INSTRUMENTS

IFRS 7 requires that the classification of financial instruments at fair value be determined by reference to the source of inputs used to derive the fair value. This classification uses the following three-level hierarchy:

- Level 1 - quoted prices in active markets for identical financial instruments
- Level 2 - inputs other than quoted prices included within level 1 that are observable for the financial instrument, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3 - inputs for the financial instrument that are not based on observable market data (unobservable inputs)

Classification of financial instruments within the IFRS 7 fair value hierarchy: level 2 for all values as of 30 September 2014. There were no changes for classification within the fair value hierarchy.

Derivatives are initially recorded in the balance sheet at fair value and subsequently measured at fair value at each balance sheet date. All derivatives are carried as assets when fair value is positive and liabilities when fair value is negative. Derivative instruments that are not designated as hedges (hedge accounting) are measured at fair value, and the change in fair value is recognized in the consolidated statement of income. When the derivative is designated as a hedge (hedge accounting) the effective part of the change in fair value is recognized in other comprehensive income. Any ineffective part is recognized in the consolidated statement of income. The foreign exchange forward contracts are measured based on the closing date's observable spot exchange rates and the quoted yield curves of the respective currencies. Interest rate swaps are measured based on present value of the cash flows, which are discounted based on the quoted yield curves.

## ACQUISITIONS AND DIVESTMENTS

In June Konecranes completed the acquisition of the remaining shares of Jiangsu Three Horses Crane Manufacture Co. Ltd. ("SANMA") and now owns 100 percent of the company. In November 2009, Konecranes announced that it had finalized the acquisition of a majority holding ( 65 percent) in SANMA. Transaction decreased Konecranes equity attributable to the equity holders of the parent company by EUR 1.9 million and the non-controlling interest by EUR 6.4 million.

In May Konecranes sold two minor service operations, one in Belgium and one in Germany. The disposal of these two operations resulted EUR 0.5 million profit reported in the other operating income of the statement of income.
