

PRESS RELEASE

Halmstad, November 3, 2014

HMS receives a 0.5 Mio € order for Ethernet/IP technology used in safety controllers.

HMS has signed a contract to deliver Anybus® Ethernet /IP technology used in safety controller with a world leading German safety technology manufacturer.

The HMS Anybus Ethernet/IP hardware is used in safety controllers in order to exchange data between the controller network and the safety application. The total volume of this contract is more than 0.5 Mio € with shipment for the coming 18 month.

"Safety technology and industrial Ethernet grows more and more together in our European market. We are well positioned with our Anybus communication technology and safety network technology offer for the expanding market for industrial applications. Especially here in Germany we see a good growth for safety networks and high demands from the device manufacturer to integrate safety networks in their devices" says Thilo Döring, Sales Director at HMS, Germany.
