Rejlers signs contract with Swedavia Airport Telecom

Rejlers signs contract with Swedavia Airport Telecom AB regarding Central Network Administration (CNA). The agreement means that Rejlers manages and is responsible for the documentation of property networks for Swedavia Airport Telecom AB.

CNA receives all orders of network access and manages the connection routes as well as the work orders for Swedavia's contractors. In larger construction projects, all network documentation will be managed by the CNA. Rejlers will also manage an inventory work of all computer networks in the electronic registration program Elkoda.

The agreement gives Rejlers the opportunity of a long-term cooperation with Swedavia regarding the implementation of an efficient concept for the management of change in property networks. The contract covers all Swedavia airports and applies until 2017-11-30 with a possible one-year extension.

Swedavia Airport Telecom AB is a subsidiary of Swedavia Real Estate AB and offers services in communication and passive network infrastructure.
