COMMENTS FROM THE GROUP CEO

We finish off a great year with an excellent final quarter, the strongest in the company's history. We have won many new deals, a number of framework agreements and extended several contracts with existing customers. It is particularly pleasing to note our achievements in the areas of e-archiving and Life Sciences.

For both the full year as for the last quarter, we have strengthened all our sales and profit figures. Our revenue growth of 16% generates an increase in profitability (EBITDA) of 21% for the year, and 41% for the quarter, demonstrating the scalability of our business model. This was achieved despite the fact that we have increased our operational costs by investing in the building up of our own delivery organization in Sweden and by establishing operations in the US and the Netherlands.

At the same time, we still see a lot of unrealized potential in our business. Mainly, we see potential for improvements in profitability in the Danish municipal market, in the area of e-archiving and for our offerings to the life science industry. During the latter part of 2014 we have improved all of these areas and expect a continued positive trend.

We have, for some time, expected more regarding e-archiving. During the fourth quarter we made a couple of deals in the area, but even more important is to note that

the first call-off from The Swedish Association of Local Authorities and Regions framework agreement has been made and that Formpipe won the deal (Mölnadal Municipality). This could be the starting point for municipalities when it comes to investing in e-archive.

We can once again conclude that our business model, with a large share of recurring revenues, generate strong cash flow (SEK 77 million). During the year we have, according to plan, made repayments for our loans and net debt now amounts to SEK 117 million (SEK 142 million).

In summary, 2014 was a good year in which we successfully improved our profitability and by that we have positioned ourselves for an even better 2015.

MARKET

According to the Radar Group, ECM continues to be a high priority investment area for companies and organizations. Greater regulatory requirements and effective information management as a means of competition are important driving forces that have a tendency to be continually strengthened in connection with the increased amount of information. The Danish and Swedish license markets for ECM software will, according to Gartner, amount to around SEK 840 (800) million in 2014, which is an increase of almost 5 percentage points.

Formpipe targets the markets for the public sector in Sweden and Denmark as well as the international market for life sciences.

PUBLIC SECTOR

DANISH PUBLIC SECTOR

The Danish public sector is the largest individual market for Formpipe. Formpipe is the market leader in the public sector and has a broad product offering with associated services within the ECM area (document and message management, payment handling and self-services / modes of cooperation). The Danish public sector is a model for efficient and digital public administration in Europe and has an express focus on investing in IT support in order to boost its internal efficiency.

SWEDISH PUBLIC SECTOR

Formpipe has a broad product offering within the framework for ECM to the Swedish public sector for compliance with regulatory requirements and to facilitate efficient and digital public administration. In the future, the company believes, as do external analysis companies, that the need for more efficient management will mean that the Swedish public sector will continue to invest in existing or new IT systems in order to realize its potential.

CHALLENGES/DRIVING FORCES IN THE PUBLIC SECTOR

Public administrations, both in Sweden and in Denmark, are facing the challenge of improving efficiency, productivity and the quality of their services. All these challenges must though be met with unchanged or even reduced budgets. Information and communication technology helps the public sector to handle challenges such as:

- Ever increasing squeeze on financial conditions.

- Increased demands in regard to transparency and improved service levels from citizens and companies.
- A demographic reality that means that in future we must do more with fewer resources.

LIFE SCIENCE

Within the private sector, the company's efforts are focused strongly on becoming an established supplier of quality management related services (remediation, audit, QMS) and software systems (document, training record and forms processing management) to the life science sector. Like the public sector, this sector has strict regulatory requirements. The market is strictly regulated by the national regulations of the market that the product or service is to be submitted to (in the US the regulator is the Food and Drug Administration (FDA), in the European Union it is the EMEA, etc). For multi-national companies or companies working in multiple markets it makes the segment more complex and opens up an export market that is far larger than the primary markets.

The market for ECM products for Life Sciences is set to grow at the mid-tier (200-1000 users) as these companies take on more of the traditional large Pharma business. At the large Pharma (>1000 users) level there is a move to replace multiple departmental systems with integrated end-to-end enterprise systems that are more cost effective to manage and maintain. There is also growth in the 'Service Provider' companies to Life Sciences as they become key to the supply chain and need compliant electronic Quality systems to manage their activities and meet the necessary standards of the sector.

In addition to the strict FDA regulatory framework the Life Sciences sector in the US, the segment prefer to be serviced by a presence in the US due to a combination of data security and time zone offset from Europe. The US remains one of the strongest areas of development and demand for Life Sciences' products and is a key market for Formpipe's Life Science growth.

THE FUTURE

Formpipe is a leading supplier of ECM solutions in Sweden and Denmark. The board considers that the company is well-positioned to be able to develop and strengthen its leading position while retaining good profitability levels. The company sees good opportunities to continue to utilize its experience from its successes within the public sector in Sweden and Denmark, which from an international perspective are considered models for efficient public administration, in order to target new markets and customer segments. With well-invested products, solid experience of the public sector and facilities for continued product development, the company sees opportunities to focus on the demand at EU level which with increased regulatory requirements can be expected to increase its investments in the coming years. In addition to the Swedish public sector, Formpipe Software also focuses on the life science sector, which like the public sector is a segment that is strictly regulated by regulatory requirements. The Company has developed a very competitive

offering to this sector. The life science market is faced with the same regulatory requirements regardless of geographical location, which creates a very large international market. The company's strategy with focus on the public sector and Life Science creates good opportunities to be able to efficiently develop market-leading offerings and need sector-specific requirements.

The board believes that Formpipe, which is one of the largest European-based ECM suppliers, is well-positioned with a stable customer base, a high share of recurring revenue and a focus on customer segments with a high need for ECM solutions. At the same time, the board considers that the ECM market is a sector undergoing consolidation and views acquisitions as a good complement to organic growth.

BUSINESS COMBINATIONS

In order to strengthen Formpipe's position in the Life Science industry, the British company GXP Ltd. (GXPI) was acquired July 1. GXPI is an established provider of compliance advisory and solutions for the life science industry. The acquisition was for 100 % of the shares in GXPI and has impacted the group balance sheet and cash position as specified below. The earn-out is valued at 57 % of the maximum. Since the transaction date, GXPI has contributed MSEK 8.0 in sales and MSEK -1.7 in operating profit before depreciation and non-recurring transaction related expenses (EBITDA). Had the acquisition taken place on January 1, 2014 GXPI would have contributed a total of MSEK 16.3 in sales and MSEK -1.0 in EBITDA.

Goodwill has been recognised, consisting of synergies and staff. Fair value adjustments have been made to the book values represented by the excess price embedded in the purchase price and attributed to customer relationships, brand names and existing technology. The adjustments also consider the effect on deferred tax. No portion of the recognised goodwill is anticipated to be income tax deductible.

The acquisition balance sheet is subject to final adjustments no later than one year after the transaction date.
