## Opus Launches Vehicle Inspection Program in Bermuda

**Opus Prodox AB (publ) today announces that Bermuda Emissions Control, Ltd. and their partner, SysTech International LLC, an Opus wholly-owned subsidiary, have begun inspecting vehicles for emissions and road worthiness in three new inspection facilities in Bermuda.**

The Bermuda Transport Control Department (TCD) has contracted Bermuda Emissions Control, Ltd. (BECL) to design, build, equip and operate a central vehicle inspection facility in Hamilton and two satellite facilities in Rockaway and Southside. BECL contracted with SysTech to design, integrate and install safety and emissions equipment in addition to a Vehicle Inspection Database (VID). April 6 was the grand opening of the new stations. On this first day of operations, 184 vehicles were inspected and about 80 percent passed.

"The new program is going to greatly improve the quality of service to the customer", said Ian Hind, Director of Operations, BECL. The three new stations replace two former government run stations. Ian Hind added, "Our system is objective, repeatable, consistent, transparent and auditable".

BECL's contract with TCD to operate the inspection program is for five years plus a potential five year extension. The program will inspect approximately 42,000 vehicles per year.

"We are pleased with the smooth start-up of the Bermuda inspection program", said Lothar Geilen, CEO of SysTech International. "We look forward to continuing the great relationship with BECL and TCD that has brought us to this successful opening day. We also see this as an important reference for future expansion in the Caribbean and Middle America".
