Notes to the financial statement of the year 2014.

The total turnover in 2014 of A/S "Tosmares kugubuvetava" reached more than 4,9 million Euro (4 879 870 Euro) which is 26,6 % less compared to the previous year.

In spite of reduction of the turnover in comparison with 2013 the market of ship repair services has grown up.

If in 2013 the significant share of the turnover (over 45 %) took up customers from two countries (Lithuania, Russia), that in 2014 except of these countries are also represented the countries like Norway, Panama, Malta, the Netherlands and others.

Compared with the previous year the share of ship-repair works again has in the top of the structure of industrial loading of the Company, namely:

	2014	2013
-shipbuilding and constructional jobs	19 %	29 %
- ship repair	78 %	68 %
- others orders	3%	3%
The total turnover	100%	100%

The share of export services has grown from 82.3 % in 2013 up to 96.1 % in 2014.

In the 2014 also the manufacturing of non-standard equipment was carried out. So called "Reel" was produced on order of the gas producing company.

There was a change of management structures of the Council and the Board of Directors of the Company in the first half of 2014.

The management in their work pays attention not only to performance of commodity orders, but simultaneously also plans works onto arrangement of industrial base as well as internal territories of the Company. Several works concerning replacement of technical equipment of dry docks have been carried out in order to increase the effectiveness of water pumping out of the dock's. Also cleaning works have been performed inside docks. Repair of yard's tugs have been carried out with the purpose of expansion their services etc.

In the first half of the year the company completed with the loss more than 460 thousand EUR, but in the second half as a result of improving economic activity with the profit more than 445 thousand EUR.

In 2014 the certification of the enterprise continued.

In addition to the quality certificate - ISO 9001:2008 received in 2013, the certificate EN 1090-2 was received in 2014.

NOTES

ACCOUNTING POLICIES

(1) General principles

Financial statements are prepared in accordance with the Laws of the Latvian Republic On Accounting and On the Annual reports and the Regulations of Cabinet of Ministers Nr. 488 "Provisions of Law enforcement on Annual report " and No. 481 "Regulations on the cash flow statement and statement of changes in equity contents and order of preparation" As the best practice are applied the Latvian accounting standards.

The income statement is prepared in accordance with the turnover method.

The Cash flow statement has been prepared under the direct cash flow method.

The financial statements are prepared based on going concept and according to the historical cost accounting principle.

In comparison with the previous financial year, the accounting and evaluation methods used by the Company has not been changed.

In connection with the Latvian official currency exchange from 1 January 2014, the Company's functional and reporting currency is the euro, which replaced the national currency Latvian lats. Prior period financial information that has been presented in Latvian lats, have been converted into euro using the official currency exchange rate of 0.702804 LVL against EUR 1. Since the Latvian lats had previously been pegged to the euro with the same exchange rate, the functional and reporting currency change had no effect on company's financial statement, financial results and cash flows.

The accompanying financial statements have been drawn up in the Latvian national currency - the euro (EUR).

(2) Income recognition and net sales

Net sales contain the total value of goods and services sold during the year excluding discounts value added tax and costs related to sales.

In accordance to the Regulations of Cabinet of Ministers, revenue from ship repair work is recognized when the customer has accepted the executed repair work.

Other income are recognized as following:

- rent income – in the moment of appearance;
- income from fines and penalties – in the moment of its receipt;
- dividends – at the moment when the legal rights on them arise.

(3) Long-term agreements

Agreement costs are recognized when incurred. When the outcome of an agreement cannot be estimated reliably, agreement revenue is recognized only to the extent of agreement costs incurred that are likely to be recoverable. When the outcome of an agreement can be estimated reliably and it is possible that the agreement will be profitable, agreement revenue is recognized over the period of the agreement. When it is probable that total costs will exceed total agreement revenue, the expected loss is recognized as an expense immediately.

The Company apply the percentage of completion method to determine the appropriate amount to recognize in a given period. The stage of completion is measured by reference to the agreement costs uncured up to balance sheet date as a percentage of total estimated costs for each agreement or carrying out surveys of work performed to date. Costs incurred in the year in connection with future activity on an agreement are excluded from agreement in determining the stage of completion. They are presented as inventories or other assets, depending on their nature.

(5) Nemateriālie ieguldījumi

Intangible assets are valued as per initial cost excluding accumulated amortization. Amortization is calculated on a straight-line method useful life is determined as 4 years.

(6) Fixed assets and low-grade material

Fixed assets are estimated according to their initial expense value or reestimated initial value, excluding accrued depreciation. Depreciation is calculated according to (linear) method, using the rates of fixed assets depreciation calculation, that are based on the evaluation of fixed assets useful service duration:

	<u>Gadi</u>	<u>%</u>
Buildings	33.3	3
Equipment and technical utilities	10	10
Rolling stock, seacraft transport, power plant	14.3	7
Furniture and office machines	10	10
Computers and facilities	4	25
Vehicles	5	20
Instruments and inventory	10	10

The depreciation of fixed assets is started to calculate with the first day of next month after its commissioning and is finished with the first day of next month after its exclusion from fixed assets.

Company capitalizes fixed assets whose value exceeds EUR 142,29 and the period of useful utilization exceeds 1 year.

Reestimating the fixed assets, their value increase is reflected in non-current investment reestimation reserve. To incomes in profit or loss statement is applied to fixed assets liquidation.

Net gains or losses from disposal of fixed assets is calculated, as the difference between the carrying amount of the fixed asset, write-off of related assets revaluation reserve (if any) and proceeds from sale, and recognized in the income statements during the period when disposal are incurred.

Low-grade stock booked at the purchase prices and costs was 100% written off after commissioning.

(7) Non-current investments in leased fixes assets

Expenses of leased fixed assets overhaul are written off according to linear method rate in time of the period.

(8) Rent with ransom (financial leasing)

In cases when fixed assets that are obtained in lease with ransom (financial leasing) in relation to what all risks and liabilities pass over to the company, that is characteristic to ownership, is considered as company's actives at such value as they could be acquired for spot cash. Leasing interest payments and similar payments are included in profit or loss statement of the period when they have arisen.

(9) Lease without rights of ransom (operative leasing)

In cases when fixed assets are leased on lease provisions without rights on ransom, lease payments and prepayments for lease are included in profit or loss statement according to linear method in the period of lease.

(10) Inventories

Inventories are stated at the lower of purchase or production cost and net realizable value. Purchase costs consists of purchase value and overheads, which have been acquired, by delivering inventories at their current position and value. The costs of materials and other expenses that are directly connected with the production of the appropriate item as well as a respective part of overhead expenses are included in the production cost of inventories. Selling expenses has not included in cost. Cost is stated on the weighted average method. When the net realizable value of inventories is lower than its costs, the difference is recognized as provisions for the decrease of value.

Inventories are reflected at the lowest market or purchase value, using the FIFO (weighted average) method. In case of necessity the value of obsolete, slow turnover or damaged stock is written off.

In prime costs of produces goods are included the costs of used raw materials and materials and other expenses that are directly connected with production of corresponding object.

(11) Accounts receivable

Account receivable in the balance sheet have been shown at the net value, obtained deducting provisions for doubtful debts from the total amount of Account receivable. Account receivable's actual sum complies with contracts and other accounting basic documents. The comparison of account's receivable debts has been performed and the bad debts has been written-off.

(12) Other investments

Non-current investments, excluding investments in subsidiaries and associates, are stated at purchased value, adjusted in cases of their permanent value increase or decrease.

(13) Cash and cash equivalents

In the report of cash flow consist of the money in cash-box, remnants of active bank cont and demand deposits in the credit institutions with term to 90 days.

(14) Accrued liabilities for unused annual leave

Amount of accumulated unused annual leave is determined by multiplying the average day rate og employees for the last six monts of the financial year by the amount of accrued but unused annual leave at the end of the reporting year.

(15) Corporate income tax

Corporate income tax was calculated according to Latvia Republic tax laws. Tax laws in 2014 and further fixed tax rate is 15%.

(16) Deffered tax

Deferred tax is calculated according to the liability method with respect to all temporary differences between the values of assets and liabilities in the financial statements and their tax basis. The deferred tax liability is calculated based on the tax rates that are expected to be applied when the temporary differences reverse. The temporary differences arise from different fixed asset depreciation rates, as well as from tax losses carried to the next taxation periods. In cases, when the total result of the deferred tax calculation is to be reflected as assets, it is recognized in the financial statement only if a future taxable profit will be available against which the temporary differences can be utilised.

(17) Grants

For fixed assets formation received grants are regarded as next periods incomes, that gradually includes the in incomes received of for grants acquired fixed assets in useful utilization time of period. Other grants are related to results of the year of account in the period of grant receipt.

(18) Use of calculations

Preparing the financial statements, company's management has to make calculations and assumptions that influence the actives and passives shown in statements and off-balance for the day of statement preparation, as well as shown incomes and expenses of accounting period. The actual results can differ from these calculations.

(19) Related parties

Related parties are considered Group companies, Board and Council members, their close family members and Companies, in which the previously mentioned persons/Group companies have significant influence or control.
