

PRESS RELEASE

Helsingborg, April 16, 2015

Nederman receives two orders in the Americas with a combined value of 45 MSEK

Nederman has received an order for a Mikropul long bag pulse jet fabric filter system from a major steel producer in the USA, and an order for ten Pneumafil Reverse Air Filters from a major soya processing plant in Brazil.

The two orders are booked in Q1, 2015.

The steel production company's existing air filtration equipment is undersized. Nederman has worked closely with the customer to engineer the solution to fit the existing facility. Nederman delivers a complete solution, which will be installed by Q1, 2016.

The soya processing company in Brazil will use the Nederman Pneumafil Reverse Air Filters (RAF) in the construction of a new soya processing plant in Brazil. This order incorporates the recently developed intrinsically safe version of the RAF filter (RAF-IS) for enhanced safety handling combustible dust. This equipment will be delivered by Q4, 2015.

"We continue to strengthen our position in the USA. These orders confirm our ability to fulfill the customers' need of eco-efficient solutions that filter, clean and recycle", says Per Lind, SVP, Division Americas.
