

## PRESS RELEASE

# Enea renews frame agreement worth 14.9 MEUR over two years with a leading global mobile broadband customer

**STOCKHOLM, Sweden, April 28, 2015.** Enea (NASDAQ OMX Nordic: ENEA) has renewed a frame agreement that covers a broad range of the Enea's product portfolio including development and production rights for OSE and OSEck. This agreement may also scale with the introduction of new Enea products and open source services during the agreement period.

The renewal also includes increase of production licenses for LTE shipments and licenses for a new runtime environment (part of Enea's OSE Compatibility Platform, OCP) – a solution that will make it possible to run and accelerate the performance of legacy applications in Linux based environments.

*"I am proud of this deal. This is a two year extension of a successful and key relationship and to see some of our new and innovative products being part of this agreement is rewarding", said Anders Lidbeck, President and CEO of Enea. "Our operating systems have been successful in the telecom industry for a long time and are embedded in a majority of the world's 3G and fast growing number of LTE base stations. Continued product innovation is key both for us and our customer, to stay ahead in the next generation of virtualized networks."*
