Rejlers projects Kungsbrohuset in Stockholm

(REJL B)

Jernhusen is building a 28 000 m² large property, Kungsbrohuset, near Stockholm Central Station and the City terminal. Kungsbrohuset will be built with dependable materials and clever solutions adapted to affect the environment as little as possible. Kungsbrohuset will be finished by the end of 2009 and will contain flexible office areas and attractive premises for shops, restaurants, cafés, gym etc.

Rejlers has been appointed as consultants for power supply, electric-, tele- and computer installations as well as security constructions at the planned construction of Kungsbrohuset.
