

Company announcement from Vestas Wind Systems A/S

Randers, 21 December 2007 Company announcement No. 45/2007 Page 1 of 1

V82-1.65 MW order for Vestas in the USA

Vestas has received an order for 55 units of the V82-1.65 MW wind turbine in the USA. The turbines, which have a total installed capacity of 91 MW, will be delivered as the first phase of the Notrees Windpower project, located in Ector and Winkler counties in Texas.

The order has been placed by Duke Energy, a leading energy company focused on electric power and gas distribution operations, and other energy services in the Americas. Duke Energy has more than 1,000 MW of wind assets under development in the Western and Southwestern USA, including Texas and Wyoming. The Notrees Windpower project is being developed and will be owned and operated by Duke Energy.

Vestas will supply and commission the 55 wind turbines and provide service and maintenance for three years. The turbines are scheduled for delivery in the second half of 2008, and commissioning is expected to be completed at the end of 2008.

"We are extremely pleased with Duke Energy's order, which will add to the existing projects in Texas for which Vestas has supplied wind turbines. Texas is currently the leading wind state in the USA in terms of installed MW, and clearly demonstrates how wind power brings not only clean and renewable energy, but also increased economic activity and local jobs to a state or a community," says Jens Søby, President of Vestas Americas A/S. "We are very much looking forward to working with Duke Energy on the Notrees Windpower project."

The above order does not affect Vestas' expectations for 2007 and 2008, cf. Company announcement No. 35/2007 of 6 November 2007.

Any questions may be addressed to Jens Søby, President of Vestas Americas A/S, telephone +1 503 327 2000, or to Peter Wenzel Kruse, Senior Vice President of Group Communications at Vestas Wind Systems A/S, telephone +45 9730 0000.

Yours sincerely Vestas Wind Systems A/S

Ditlev Engel President and CEO
