Cybercom signs 2-year contract with Stockholm County Council

Cybercom signed a new master contract with Stockholm County Council. The contract covers consulting services in IT control, operations development, informatics, system development and administration, infrastructure and operation plus information security. The 2-year contract has an option for extension.

"This master contract with the Council is aligned with our growth strategy with the public sector," says Patrik Boman, president and CEO of the Cybercom Group, "and it is very important for Cybercom. The public sector faces tough challenges due to increasing demands for cost-effective solutions and more available IT support."

"The deal further strengthens our extensive partnership with the Council," says Annika Lövstrand Ianni, key account manager at Cybercom Sweden East. "We received positive feedback from the customer during the selection process – particularly for our consultants' expertise and for the value that they add for the customer. Getting such a response from an existing customer is very stimulating."

The Council is responsible for health, medical, and dental care operations, public transportation (including taxi service for the disabled), regional planning, and culture and education issues for Stockholm County, which employs 45,000 persons. Council staff estimate that the procurement is worth about SEK 100-150 million annually. As a selected master contract partner, Cybercom has fantastic opportunities for many exciting projects and assignments.
