

Vigmed wins tender for paediatric IV-catheter in Denmark.

Vigmed announced today that their partner, CODAN DEHA ApS, has won a tender for the patented safety catheter, Vigmed® CLiP® Neo, in Region Nord of Denmark.

Vigmed's distribution partner in Denmark, CODAN DEHA ApS, was awarded a contract for up to four years for CLiP® Neo. This patented product helps prevent accidental needle stick injuries primarily within neonatal and pediatric care.

“This is the result of a successful partnership with CODAN DEHA and a great affirmation that our product and development procedures can deliver what we promise. This further strengthens our position in Denmark and confirms that we have the right platform to continue to see further success in other European markets”, comments Vigmed Sales Director, Mike Dooley.

”CLiP® Neo corresponds very well to the tender requirements for safety products and it got an excellent evaluation related to both product design and functionality in this particular tender. The fact that we can offer two sizes – both 24G and 26G – also played a part in winning the tender”, says CODAN DEHA ApS Country Manager, Thomas Hornstrup.
