

Order from InformDS Technologies (P) Ltd, India

LUND, 2th July , 2015 — Anoto Group AB is pleased to announce that it has received an order for 10,000 digital pens and the accompanying software from InformDS Technologies (P) Ltd. The total order value is approximately 12 MSEK plus recurring revenues and the order will be delivered in full by December 31st, 2016. The first shipment has already been made.

Based in Bangalore (India), InformDS has been working with the Anoto LivePDF platform for over a year. The LivePDF platform is embedded in InformDS's "Practice in an App" offering that helps to automate physician practices. Over 25 physicians have successfully used this new application as part of an initial pilot. The LivePDF service, in combination with InformDS's application, enables easy and ubiquitous access to patient information for a physician instantly and from any location. InformDS will be rolling-out the service for general use.

"The Anoto technology enables us to capture the necessary information and make it available digitally, without needing to employ staff for data processing and – most significantly – without requiring our physicians to switch away from their preferred method of writing with a pen on paper" observed Varinder Kaur, Director-InformDS

"This is the second large order within healthcare in India this year and a result of a focused business development effort. We see a very large potential to offer user friendly, secure and cost effective digital writing solutions in India and to participate in the digital transformation process within important areas such as healthcare, financial services and education", says Stein Revelsby, CEO at Anoto Group.
