## **Aarsleff to carry out cruise ship quay on Gotland in Sweden**

Per Aarsleff A/S has entered into a contract with Region Gotland in Sweden for the execution of a cruise ship quay in Port of Visby on Gotland in the Baltic Sea.

The project has an expected total value of DKK 125 million depending on the final design and is carried out as a partnering contract. It has a significant strategic importance, as partnering projects in Sweden are a long-term interest.

The first phase with draft design and pricing will begin now, while the final execution phase is expected to begin in January 2016.

The cruise ship quay is carried out as a pile supported quay deck and will allow ships up to a length of 340 metres to berth, as opposed to previously when the cruise ship guests had to be sailed into Port of Visby in smaller boats.

In Denmark, Aarsleff has recently carried out the new cruise ship quay in Port of Skagen which was recently inaugurated.

The contract does not affect Aarsleff's earnings expectations for the financial year 2014/2015.
