## Tactivo follow-up order from NHS Foundation Trust

Precise Biometrics has received an additional order for Tactivo™ from an English National Health Service (NHS) Foundation Trust. The order will impact third quarter revenues with 490,000SEK.

Tactivo is used for secure mobile access to healthcare systems and delivered as part of an integrated solution provided by Precise Biometrics' partner Isosec Ltd. The Trust has chosen to expand their number of Tactivo smart card readers, enabling more staff swift and secure access to relevant patient data, reporting and information exchange on iPad devices. The solution allows care providers to spend more time with patients while ensuring instant access to patient information. This increases care quality and reduces time spent on administration.

*"We are pleased to see that this NHS Trust is following up on their previous order from May. This shows their confidence and commitment to Tactivo for convenient and secure mobile access to information systems and resources. The solution increases employee flexibility and efficiency, while ensuring a high level of security by utilizing two-factor authentication", says Håkan Persson, CEO of Precise Biometrics.*

The healthcare system is accessed through two-factor login using a smart card, Tactivo, iPad and Isosec's mobile authentication software (MIA).
