## 5. EXPLANATORY NOTES

### 1 SUMMARY OF THE BASIC ACCOUNTING PRINCIPLES AND PRACTICES

The public company Vilniaus Baldai (Company) is a listed Company in Lithuania.

The Company manufactures furniture. As of 30 June 2015 the Group employed 755 people, the Company employed 701 people (on 31 December 2014 the Group employed 671 employees, the Company – 629). The Company's shares are traded on the Official List of the NASDAQ OMX Vilnius AB Stock Exchange.

#### **Significant accounting policies**

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the European Union (hereinafter the EU). The financial statements have been prepared under the historical cost convention.

#### **Basis for drawing up of the interim condensed consolidated statement**

The interim condensed consolidated financial statements for the three months ended 30 June 2015 have been prepared in accordance with IAS 34 Interim Financial Reporting.

The interim condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group's and the Company's annual financial statements as at 31 December 2014.

In the financial statements, all figures are provided in EUR thousand. The statements are drawn up applying the method of historical costs.

When drawing up the financial statements in accordance with the IFRS, the managers are required to make calculations and estimations to support the assumptions that have an impact on application of the accounting principles and on the amounts of assets and liabilities, income and costs. The calculations and related assumptions are based on historical experience and other factors that correspond to the present situation and on the basis of which conclusions concerning the carrying amount of assets and liabilities are made that cannot be decided on the basis of other sources. The actual amounts may differ from these assumptions.

The Group's and the Company's accounting policies are consistent with those used in the previous years.

#### **Functional and presentation currency**

Starting from 1 January 2015 the Company's Financial statements currency is Euro.

The Company's' accounting data nominated in Litas prior to Euro adoption in Lithuania (as of 31 December 2014) are converted from Litas to Euro at the Official Exchange rate 1 EUR = 3,45280 LTL.

Differences derived from assets and liabilities balances, income and costs denominated in Litas conversion to Euro are recognized as current period financial and investment income or cost. Conversion result (income or loss) is reported in the Statement of Comprehensive Income as financial income or cost.

#### **Principles of consolidation**

The consolidated financial statements of the Group include Vilniaus Baldai AB and its subsidiary. The control is normally evidenced when the Group owns, either directly or indirectly, more than 50 percent of the voting rights of a company's share capital and/or is able to govern the financial and operating policies of an enterprise to benefit from its activities.

Subsidiaries are consolidated from the date from which effective control is transferred to the Company and cease to be consolidated from the date on which control is transferred out of the Company. All intercompany transactions, balances and unrealized gains and losses on transactions among the Group companies have been eliminated.

Consolidated financial statements are prepared on the basis of the same accounting principles applied to similar transactions and other events under similar circumstances. Financial statements of Subsidiary were prepared for the same period as that of the Company.

### **Intangible assets**

Intangible assets are measured initially at cost. Intangible assets are recognized if it is probable that future economic benefits that are attributable to the asset will flow to the enterprise and the cost of asset can be measured reliably. After initial recognition, intangible assets are measured at cost less accumulated amortization and any accumulated impairment losses. Intangible assets are amortized on a straight-line basis over the best estimate of their useful lives.

#### Software

The costs of acquisition of new software are capitalized and treated as an intangible asset if these costs are not an integral part of the related hardware. Software is amortized over a period not exceeding 3 years.

Costs incurred in order to restore or maintain the future economic benefits that the Group and the Company expects from the originally assessed standard of performance of existing software systems are recognized as an expense when the restoration or maintenance work is carried out.

### **Property, plant and equipment**

Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses.

When assets are sold or retired, their cost and accumulated depreciation are eliminated from the accounts and any gain or loss resulting from their disposal is included in the statement of comprehensive income.

The initial cost of property, plant and equipment comprises its purchase price, including non-refundable purchase taxes and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property, plant and equipment have been put into operation, such as repair and maintenance costs, are normally charged to the statement of comprehensive income in the period the costs are incurred.

Depreciation is computed on a straight-line basis over the following estimated useful lives:

Buildings	10 - 66 years
Machinery and equipment	6 - 10 years
Vehicles	5 - 10 years
Other property, plant and equipment	2 - 6 years.

The assets' residual values and useful lives are reviewed periodically to ensure that the period of depreciation is consistent with the expected pattern of economic benefits from items in property, plant and equipment.

Construction-in-progress is stated at cost. This includes the cost of construction, plant and equipment and other directly attributable costs. Construction-in-progress is not depreciated until the relevant assets are completed and available for use.

Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial time to get ready for intended use or sale (qualifying assets) are capitalized as part of the costs of those assets.

Capitalization of borrowing costs continues up to the date when the assets are substantially ready for their use or sale.

The Group capitalizes borrowing costs that could have been avoided if it had not made capital expenditure on qualifying assets. Borrowing costs capitalized are calculated at the group's average funding cost (the weighted average interest cost is applied to the expenditures on the qualifying assets), except to the extent that funds are borrowed specifically for the purpose of obtaining a qualifying asset. Where this occurs, actual borrowing costs incurred less any investment income on the temporary investment of those borrowings are capitalized.

### **Financial assets**

Financial assets are classified as either financial assets at fair value through profit or loss, held –to - maturity investments, loans and receivables, and available – for - sale financial assets, as appropriate. The Company determines the classification of its financial assets based on its nature and purpose at initial recognition.

Financial assets are recognized on a trade date basis where the purchase or sale process is under a contract, which terms require delivery of the financial assets within the timeframe established by the market concerned. Financial assets are recognized initially at fair value, and, in the case of investments are not carried at fair value through profit or loss, directly attributable transaction costs.

The Group's/ Company's financial assets include cash, time deposits, trade receivables and other receivables and loans are classified in the category of loans and receivables.

The subsequent measurement of financial assets depends on their classification as follows:

#### Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are carried at amortized cost using the effective interest method. Gains or losses are recognized in the statement of comprehensive income when the loans and receivables are derecognized or impaired, as well as through the amortization process. Receivables are initially recorded at the fair value of the consideration given. Current receivables are subsequently carried at cost less impairment, and non-current receivables and loans granted - at amortized cost, less impairment.

Loans and receivables are included in current assets, except for maturities greater than 12 months after the end of the reporting period. These are classified as non-current assets.

#### Effective interest rate method

Effective interest rate method is used to calculate amortized cost of financial assets and allocate interest income over the relevant period. The effective interest rate exactly discounts estimated future cash flows through the expected life of the financial asset.

#### Derecognition of financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the rights to receive cash flows from the asset have expired;
- the Group/ Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass through" arrangement; or
- the Group/ Company has transferred their rights to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

### **Investments into subsidiaries**

Investments in subsidiaries and associated companies are accounted at cost in the Company's separate financial statements. Cost of investment is decreased by impairment losses. An assessment of recoverable amount of investment is performed for each investment individually.

Impairment is determined by assessing the recoverable amount of the cash-generating unit, to which the goodwill relates. Where the recoverable amount of the cash-generating unit is less than the carrying amount in the Company's statements of financial position, an impairment loss is recognized.

### **Inventories**

Inventories are initially recorded at acquisition cost. Subsequent to initial recognition, inventories are valued at the lower of cost or net realizable value, after impairment evaluation for obsolete and slow - moving items. Net realizable value is the selling price in the ordinary course of business, less the costs of completion and applicable variable marketing and distribution costs. Cost is determined by the first-in, first-out (FIFO) method. The cost of finished goods and work in progress includes the applicable allocation of fixed and variable overhead costs based on a normal operating capacity. Unrealizable inventory is fully written-off.

### **Trade receivables**

Trade receivables are amounts due from customers for merchandise sold or services performed in the ordinary course of business. If collection is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non - current assets.

Trade receivables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method, less provision for impairment.

### **Cash and cash equivalents**

Cash includes cash on hand and cash with banks and bank overdrafts. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less and that are subject to an insignificant risk of change in value.

For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, time deposits held at call with banks with original maturities of 3 months or less and other short-term highly liquid investments.

### **Share capital**

Ordinary shares are classified as equity. Ordinary shares are stated at their par value.

### **Dividends distribution**

Dividend distribution to the company's shareholders is recognized as a liability in the group's financial statements in the period in which the dividends are approved by the company's shareholders. Dividends paid are classified as financing cash flows in the statement of cash flows.

### **Borrowings**

Borrowing costs are expensed as incurred, unless they are directly attributable to acquisition, construction or production of a qualifying asset.

Borrowings are initially recognized at fair value of proceeds received, less the costs of transaction. They are subsequently carried at amortized cost, the difference between net proceeds and redemption value being recognized in the net profit or loss over the period of the borrowings using the effective interest method.

Interest paid is classified as financing activities cash flows in the statement of cash flows.

## **Leases**

*The Company and the Group are the lessees*

### *(a) Finance lease*

Leases of property, plant and equipment where the Company and the Group has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the lease's commencement at the lower of the fair value of the leased property and the estimated present value of the minimum lease payments. Each lease payment is allocated between the liability and finance charges so as to achieve a constant interest rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in long-term payables except for instalments due within 12 months, which are included in current liabilities.

The property, plant and equipment acquired under finance leases are depreciated over the shorter of the asset's useful life and the lease term.

### *(b) Operating lease*

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the statement of comprehensive income on a straight-line basis over the period of the lease.

*The Company and the Group are the lessors*

### *(c) Operating lease*

Payments received under operating leases (net of any incentives given to the lessee) are credited to the statement of comprehensive income on a straight-line basis over the period of the lease.

## **Grants**

Grants are registered in accounting when they are actually received. Grants related to the tangible assets are recognized in amounts equal to depreciation of respective tangible assets. If Grant is received for tangible assets acquisition, it is not recognized until tangible assets are started to depreciate. Grants for expenses reimbursement are recognized in amounts of incurred expenses. Unused grants are disclosed in the Statement of Financial position under Grants and subsidies.

## **Trade payables**

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognized initially at fair value and subsequently measured at amortized cost using the effective interest method.

## **Employee benefits**

### *(a) Social security contributions*

The Company and the Group pay social security contributions to the state Social Security Fund (the Fund) on behalf of its employees based on the defined contribution plan in accordance with the local legal requirements. A defined contribution is a plan under which the Company/ Group pays fixed contributions into the Fund and will have no legal or constructive obligations to pay further contributions if the Fund does not hold sufficient assets to pay all employees benefits relating to employee service in the current and prior period. Social security contributions are recognized as expenses on an accrual basis and are included in payroll expenses.

### *(b) Termination benefits*

Termination benefits are payable whenever an employee's employment is terminated before the normal retirement date or whenever an employee accepts voluntary redundancy in exchange for

these benefits. The Group or the Company recognizes termination benefits when it is demonstrably committed to either: terminating the employment of current employees according to a detailed formal plan without possibility of withdrawal; or providing termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than 12 months after balance sheet date are discounted to their present value.

*(c) Bonus plans*

The Company recognizes a liability and an expense for bonuses where contractually obliged or where there is a past practice that has created a constructive obligation.

*(d) Provisions for pensions and jubilee payments*

According to the terms of the collective agreement effective at the Company, each employee is entitled to a jubilee payment and 2–3 months' salary payment when retiring after reaching the pension age. Actuarial calculations are made to determine liability for such payments. The liability is recognized at present value discounted using market interest rate.

The Company recognizes re-evaluations of the pension benefit obligation in 'Other comprehensive income that will not be reclassified to profit or losses, while service cost and net interest in recognized within profit or loss. The Company within profit or loss accounts for jubilee benefits and long-service benefits.

**Provisions**

Provisions are recognized when the Group and the Company has a present obligation (legal or constructive) as a result of past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The provisions are reviewed at each statement of financial position date and adjusted in order to present the most reasonable current estimate. If the effect of the time value of money is material, the amount of provision is equal to the present value of the expenses, which are expected to be incurred to settle the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a borrowing cost.

**Income tax**

Income tax charge is based on profit for the year and considers deferred taxation. Income tax is calculated based on the Lithuanian tax legislation.

The income tax rate in Lithuania was 15% in 2015 (15% in 2014).

Starting from 2014 tax losses, except for losses due to sale of securities and (or) derivatives (of non-financial institutions), may be carried forward for an unlimited period of time, however carrying forward is stopped, if the company stops its activities due to such losses, except when the company stops its activities due to reasons beyond its control. Deductible tax losses carried forward may not exceed 70 percent of the taxpayer's taxation period income, calculated as income net of tax-exempt income, regular deductions, deductions of limited amounts, with the exception of the previous year losses.

Losses due to sale of securities and (or) derivatives (of non-financial institutions) are carried forward no more than five consecutive tax periods starting from the tax period following the tax period during which the loss was incurred. While deducting previous years' sale of securities losses from current year's securities sales income restriction (of up to 70 percent sale of securities income) does not apply.

Deferred taxes are calculated using the statement of financial position liability method. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Deferred tax assets and liabilities are measured using the tax rates expected to apply to taxable income in the years in which those temporary differences are expected to reverse based on tax rates enacted or substantially enacted at the statement of financial position date.

Deferred tax asset has been recognized in statement of financial position to the extent the management believes it will be realized in the foreseeable future, based on taxable profit forecasts. If it is believed that part of the deferred tax asset is not going to be realized, this part of the deferred tax asset is not recognized in the financial statements.

Investment tax credit, that arises from tax benefit amount carried forward, qualifies for the initial recognition exception. Therefore, no deferred tax asset is recognized at the time the tax credit arises, but recognition occurs as a reduction of current tax as the credit is realized.

Deferred tax assets and liabilities are offset when they are related to profit taxes levied by the same tax authority and when there is a legally enforceable right to set off current tax assets against current tax liabilities.

#### Income tax and deferred tax for the accounting period

Income tax and deferred income tax are charged or credited to profit or loss, except when they relate to items included directly to equity, in which case the deferred income tax is also accounted for in equity.

#### **Revenue recognition**

##### *a) Sales of goods*

Revenue is recognized when it is probable that the economic benefits associated with the transaction will flow to the enterprise and the amount of the revenue can be measured reliably. Sales are recognized net of VAT and discounts.

Revenue from sales of goods is recognized when delivery has taken place and transfer of risks and rewards has been completed.

##### *b) Interest income*

Interest income is recognized using the effective interest method. When a loan and receivable is impaired, the Group and the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loan and receivables are recognized using the original effective interest rate. Interest income is classified as financing cash flows in the statement of cash flows.

#### **Expense recognition**

Expenses are recognized on the basis of accrual and revenue and expense matching principles in the reporting period when the income related to these expenses was earned, irrespective of the time the money was spent. In those cases when the costs incurred cannot be directly attributed to the specific income and they will not bring income during the future periods, they are expensed as incurred.

The amount of expenses is usually accounted for as the amount paid or due, excluding VAT. In the cases when a long period of payment is established and the interest is not distinguished, the amount of expenses shall be estimated by discounting the amount of payment using the market interest rate.

#### **Foreign currencies**

Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies on the statement of financial position date are recognized in the statement of comprehensive income. Such balances are translated at period-end exchange rates.

#### **Impairment of assets**

##### Financial assets

Financial assets are reviewed for impairment at each statement of financial position date.

For financial assets carried at amortized cost, whenever it is probable that the Group and the Company will not collect all amounts due according to the contractual terms of loans or receivables, an impairment or bad debt loss is recognized in the statement of comprehensive income. A provision for impairment of trade receivables is established when there is objective evidence that the group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. The reversal of impairment losses previously recognized is recorded when the decrease in impairment loss can be justified by an event occurring after the write-down. Such reversal is recorded in the statement of comprehensive income. However, the increased carrying amount is only recognized to the extent it does not exceed the amortized cost that would have been had the impairment not been recognized.

#### Non-financial assets

Non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognized in the statement of comprehensive income. Reversal of impairment losses recognized in prior years is recorded when there is an indication that the impairment losses recognized for the asset no longer exist or have decreased. Reversal is accounted for in the same caption of the statement of comprehensive income as impairment losses. For evaluation of impairment of assets, the entire Group is considered one cash-generating unit.

#### **Segment information**

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of directors that makes strategic decisions.

#### **Related parties**

Related parties are defined as shareholders, employees, members of the Board, their close relatives and companies that directly or indirectly (through the intermediary) control or are controlled by, or are under common control with, the Group and the Company, provided the listed relationship empowers one of the parties to exercise the control or significant influence over the other party in making financial and operating decisions.

#### **Contingencies**

Contingent liabilities are not recognized in the financial statements. They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote.

A contingent asset is not recognized in the financial statements but disclosed when an inflow or economic benefits are probable.

#### **Subsequent events**

Post-statement of financial position events that provide additional information about the Group's and the Company's position at the statement of financial position date (adjusting events) are reflected in the financial statements. Post-statement of financial position events that are not adjusting events are disclosed in the notes when material.

#### **Offsetting and comparative figures**

When preparing the financial statements, revenue and expenses are not set off, except the cases when certain IFRS specifically require such set-off. Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Where necessary, comparative figures have been reclassified to conform with changes in the current year presentation.

### **Use of estimates in the preparation of financial statements**

The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingencies, at the reporting date and within the next financial year. Estimates and judgements are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability affected in the future.

#### Estimates and assumptions

The main areas where management is required to make significant and critical judgements and areas where estimates and assumptions might have significant impact for the preparation of financial statements are described below:

##### *Property, plant and equipment – useful life*

The key assumptions concerning determination the useful life of property, plant and equipment are as follows: expected usage term of the asset, expected technical or commercial obsolescence arising from changes or improvements in the production on legal or similar limits on the use of the asset, such as the expiry dates of related leases.

##### *Tax liabilities*

The tax authorities have a right to examine the Company's books and accounting records at any time during the 5 years' period after the current tax year and account for additional taxes and fines. In the opinion of the Company's management currently, there are no circumstances, which would raise substantial liability in this respect.

##### *Related party transactions*

In the normal course of business, the Company enters into transactions with its related parties. These transactions are priced predominantly at market rates. Judgement is applied in determining if transactions are priced at market or non-market interest rates, where there is no active market for such transactions. The basis for judgement is pricing for similar types of transactions with unrelated parties.

##### *Pension and jubilee benefits*

Key assumptions used in determining the provision for pension and jubilee benefits are as follows: employee turnover rate by age group, discount rate, and wage and salary growth. The Company's management makes judgments in relation to these assumptions.

## **2 SEGMENT REPORTING**

Management of the Company has determined the operating segments based on the reports reviewed by the board of directors that are used to make strategic decisions.

The board of directors considers the business from both a geographic and product perspective to certain extent. Geographically, management considers sales volume to Lithuania, the European Union countries and the rest of the world depending on where the production is delivered. From product perspective, management considers only the product quantities delivered by product type. All financial information, including the measure of profit and total assets, is analysed as single reportable segment – furniture production and trade, therefore is not further disclosed in these financial statements.

Breakdown of revenue by the location where production is delivered:

	<b>Sales</b>	
	<b>30.06.2015</b>	<b>30.06.2014</b>
European Union countries	18 381	16 239
Other than European Union countries	13 720	12 792
Lithuania	495	371
	<b>32 596</b>	<b>29 402</b>

### 3 DISTRIBUTION COSTS

	<b>30.06.2015</b>	<b>30.06.2014</b>
Transportation and storage costs	439	308
Remuneration and social insurance	67	52
Depreciation and amortization	5	5
Other	48	61
	<b>559</b>	<b>426</b>

### 4 ADMINISTRATIVE COSTS

	<b>30.06.2015</b>	<b>30.06.2014</b>
Remuneration and social insurance	673	490
Depreciation and amortization	49	47
Operation taxes expenses	54	38
Employee training and consultation	41	34
Insurance	27	22
Business trips	17	17
Waste utilisation expenses	43	20
Utilities and communication	14	12
Bank services	2	12
Other	209	179
	<b>1 129</b>	<b>871</b>

### 5 OTHER OPERATING INCOME, NET

	<b>30.06.2015</b>	<b>30.06.2014</b>
Rent income	99	90
Other income and costs	18	2
	<b>117</b>	<b>92</b>

## 6 FINANCIAL INCOME, NET

	30.06.2015	30.06.2014
Loan interest income	(54)	(28)
Currency exchange profit, less loss	(6)	(5)
Other financial and investment income and expenses	(6)	-
	<b>(66)</b>	<b>(33)</b>

## 7 PERSONNEL COSTS

	30.06.2015	30.06.2014
Production and product development costs	4 326	3 103
Sales, administrative and other costs	739	541
	<b>5 065</b>	<b>3 644</b>

## 8 EARNINGS PER SHARE

The basic portion of earnings per share is computed by dividing net shareholders' earnings by the weighted average number of common shares outstanding during the year.

	30.06.2015	30.06.2014
Net annual profit	1 640	2 700
Weighted average number of the shares (thousand)	3 886	3 886
<b>Earnings per share (EUR)</b>	<b>0.42</b>	<b>0.69</b>

The Company has issued no other securities that could be potentially converted into common shares. The earnings per share and the earnings per potentially convertible share is the same.

## 9 NON - CURRENT TANGIBLE ASSETS

	Buildings	Machinery and equipment	Vehicles	Other non - current assets	Total
Costs as of 1 January 2015	6 959	26 894	189	1 138	35 180
Increase	40	172	-	142	354
Sales	-	(185)	-	(4)	(189)
Writing off	(2)	(1)	(16)	(10)	(29)
Reclassified from/ to	-	31	-	(31)	-
Costs as of 30 June 2015	6 997	26 911	173	1 235	35 316
Depreciation as of 1 January 2014	3 664	16 688	103	818	21 273
Depreciation	89	823	30	44	986
Sales	-	(185)	-	(1)	(186)
Writing off	(2)	(1)	(16)	(10)	(29)
Depreciation as of 30 June 2015	3 751	17 325	117	851	22 044
<b>Net carrying value as of 30 June 2015</b>	<b>3 246</b>	<b>9 586</b>	<b>56</b>	<b>384</b>	<b>13 272</b>
Net carrying value as of 1 January 2015	3 295	10 206	86	320	13 907
Depreciation period	40 years	6 – 10 years	5 – 10 years	2 – 6 years	-

Depreciation was broken down as follows:

	30.06.2015	30.06.2014
Production and product development costs	843	765
Sales, administrative and other costs	54	43
Production in progress and finished products inventories	89	18
	<b>986</b>	<b>826</b>

## 10 INVENTORIES

	30.06.2015	31.12.2014
Raw materials	1 618	1 507
Production in progress	1 227	1 213
Finished products	5 161	1 817
Goods for resale	1	3
	<b>8 007</b>	<b>4 540</b>

Raw materials include wood, fittings and accessories, plastic elements, chemicals and other materials used in production.

## 11 OTHER ACCOUNTS RECEIVABLE

	30.06.2015	31.12.2014
VAT recoverable	982	353
Other amounts receivable and future costs	275	89
	<b>1 257</b>	<b>442</b>

## 12 CASH AND CASH EQUIVALENTS

	30.06.2015	31.12.2014
Cash in banks	124	1 096
	<b>124</b>	<b>1 096</b>

## 13 CAPITAL AND RESERVES

### Share capital

The share capital is made up of 3 886 267 common shares of the nominal value of EUR 1.16, while the total value of the share capital amounts to EUR 4 508 thousand.

### Legal reserve

The reserve of EUR 450 thousand is the legal reserve made under the laws of the Republic of Lithuania. An allocation of at least 5% of the net profit must be made into the legal reserve out of the profit to be appropriated every year until the legal reserve reaches 10% of the authorized capital.

## 14 LOANS AND OTHER BORROWINGS

	30.06.2015	31.12.2014
<b>Non - current liabilities</b>		
Finance lease	31	32
Borrowings	946	3 552
<b>Net carrying value as end of period</b>	<b>977</b>	<b>3 584</b>
<b>Short - term liabilities</b>		
Current portion of finance lease	26	34
Current portion of borrowings	1 776	3 552
Credit line	3 956	1 560
<b>Net carrying value as end of period</b>	<b>5 758</b>	<b>5 146</b>
	<b>6 735</b>	<b>8 730</b>

	<b>Maturity term</b>	<b>30.06.2015</b>	<b>31.12.2014</b>
Finance lease Danske Bank A/S	2017	57	66
Credit line Danske Bank A/S	2015	3 956	1 560
Credit Danske Bank A/S	2016	2 722	7 104

Vilniaus Baldai AB has signed the credit facility agreement with Danske Bank A/S on 17 September 2013 for working capital and investments into equipment financing. Based on the Board of Directors decision of 06 February 2015, an amendment to the original agreement was adopted stipulating shorter facility repayment term.

The Company's buildings, machinery and the current cash balances at and future inflows to the Company's accounts at Danske Bank A/S Lithuania branch were pledged as a collateral for loans granted.

#### **Interest risk**

Euribor related floating interest rates are applied to the loans extended to the Company. As of 30 June 2015, the Company used no financial instruments as interest risk hedging.

Schedule of payment for financial liabilities, secured with pledged assets:

	<b>Total amount payable as of 30 June 2015</b>	<b>2015</b>	<b>2016</b>	<b>2017</b>
Finance lease	57	26	14	17
Credit lines	3 956	3 956	-	-
Credit	2 722	1 776	946	-
	<b>6 735</b>	<b>5 758</b>	<b>960</b>	<b>17</b>

#### **15 POST – EMPLOYMENT ANT OTHER LONG TERM EMPLOYEE BENEFITS**

	<b>30.06.2015</b>	<b>31.12.2014</b>
Post – employment and other long term employee benefits	595	595
	<b>595</b>	<b>595</b>

Provision for pension and jubilee benefits comprises amounts calculated according to the collective agreement affective at the Company. Every employee of the Company is entitled to a jubilee benefit and 2 or 3 month salary payment on the leaving the Company after reaching the retirement age.

## 16 OTHER LIABILITIES

	30.06.2015	31.12.2014
Remuneration and social insurance	984	313
Holiday pay reserve	1 018	818
Dividends payable	977	982
Amounts payable for the take-over of tax losses	-	-
Operating taxes	13	35
Other accounts payable and accrued taxes	24	23
	<b>3 016</b>	<b>2 171</b>

### Currency risk

The Company's currency risk is mainly related to PLN.
