

PRESS RELEASE

Halmstad 10 August, 2015

Power production in July 46.3 GWh

Better winds than normal in July resulted in a power production of 46.3 GWh (29.4), which is 5.7 GWh over budget.

Of this 31.5 GWh (20.3) refers to own wind power and 14.8 GWh (9.1) to co-owned wind power.

At present, the market price for electricity is very low, thanks to abundant access to hydroelectric power in Norway and Sweden. Because of advantageous hedging agreements, covering most of the actual electricity production for the current year, the company has ensured electricity revenue that is considerably higher than the prevailing market price.
