The definitions of the Financial Highlights are included in Note 12 .

Unless otherwise stated, amounts in this report are in millions (mn) of Swedish krona (Skr), abbreviated "Skr mn" and relates to the Consolidated Group. The international code for the Swedish currency, SEK is not used in this report in order to avoid confusion with the same three-letter abbreviation, which has been used to denote AB Svensk Exportkredit since the company was founded in 1962.

Unless otherwise indicated, in matters concerning positions amounts refer to those as at 30 September and 31 December, and in matters of flows, amounts refer to the nine-month period which ended on 30 September and the 12-month which ended on 31 December. Amounts within parentheses refer to the same date or period, respectively, in matters concerning positions and the same period in matters of flow as the preceding year.

AB Svensk Exportkredit (SEK), Swedish corporate identity number 556084-0315, with its registered office in Stockholm, Sweden, is a public company as defined in the Swedish Companies Act. In some instances, a public company is obliged to add '(publ)' to its company name.

# Strengthened position and improved business opportunities

SEK reports a stable core profit for the first nine months of the year. Core profit amounted to Skr 396.0 million, a decrease by Skr 13.2 million compared with the same period in the previous year. The financial solutions accepted by customers during the period met expectations and amounted to Skr 37.8 billion, of which loans to companies, including export credits, amounted to Skr 21.6 billion. The outstanding volume of offers for credits amounted to Skr 48.3 billion, as of September 30, compared with Skr 25.9 billion on the same date in the previous year.

SEK is doing more and more for its customers. We have broadened our product portfolio and introduced more business areas. Furthermore, this spring SEK will be represented at the Swedish embassy in Singapore with the task of developing business opportunities for the Swedish export industry in the Asian market.

The third quarter was characterized by the global worry in the credit markets, which had its origin in the US mortgage market. SEK has no direct exposure to the US subprime mortgage market. For SEK, the worry and thereby triggered liquidity crisis has made it possible for SEK to strengthen its position in the market. This was due to the high quality of our assets, our conservative liquidity policy and our high creditworthiness. Despite the high quality of our assets the mark-to-market of our trading portfolio, amounting to Skr 15.3 billion and mainly consisting of bonds issued by banks with high ratings and larger Swedish export companies, has had a negative effect on our profit.

During the third quarter, SEK executed a three-year global bond amounting to USD 1.25 billion. The execution was very successful and was oversubscribed quickly by investors from all over the world.

During these turbulent times, we have been able to guarantee the export industry's need for attractive, long-term financial solutions and, by doing so, have fulfilled our mission – a sign of strength for both us and the Swedish export industry.

Stockholm, November 2007

Peter Yngwe CEO

# High volumes and good business opportunities

Characterised by tight margins during the first six months, the market was hit during the third quarter by a credit crunch. During this period, SEK secured a high volume of accepted customer financing solutions.

In the first nine months, new customer financing solutions amounted to Skr 37.8 billion, of which loans to companies, including export credits, accounted for Skr 21.6 billion. Last year's record lending during the same period amounted to Skr 50.8 billion. The volume of outstanding offers for credits at period-end increased with 22,4 billion to Skr 48.3 billion.

The third quarter was seriously affected by the credit worry that started in the US subprime mortgage market. Uncertainty in the market contributed to some excellent business opportunities for SEK which, due to its high liquidity and credit standing, continued to finance businesses, especially in the corporate sector.

One of the most important business deals conducted during the third quarter was the financing of an agreement between Japan's Marubeni Corporation and the An Hoa pulp mill in northern Vietnam, to which the Gothenburgbased company Elof Hansson will deliver fibreoptic equipment. SEK co-operated on the deal with the French bank Natixis, and financing was effected under the Cirr-system for fixed interest rates credits in accordance with OECD guidelines. The total investment amounts to Skr 945 million.

Many of the infrastructure and technology projects are also focused on improving the environment. Together with SEB Latvijas Unibanka, SEK also participated in the financing of the TEC-1 combined power and heating plant in Riga.

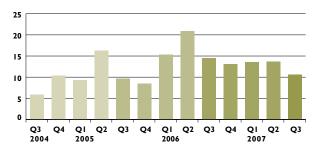

SEK signed a co-operation agreement with Nefco, Nordic Environmental Finance Corporation.

During the third quarter, SEK Securities consolidated its position and was appointed dealer for Sandvik's Swedish medium-term-note programme as well as arranged transactions for Industrivärden, Trelleborg and Landshypotek. SEK's consultancy business has continued its expansion. SEK Advisory Services is involved in a project with Vattenfall concerning project financing in Romania and Ukraine. The other part of SEK's consultancy business, SEK Financial Advisors, was commissioned to review the finance department activities of a medium-sized Swedish bank and to buy in cash management services for a large international Swedish group.

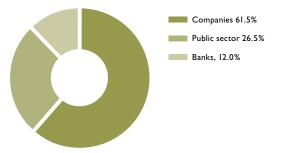

# New customer financing solutions (Skr billion)

	Jan–Sep, 2007	Jan–Sep, 2006
Export credits	10.6	17.1

Loans to other companies	5.6	1.5
Lending to the public sector	9.3	9.7
Lending to the public sector	4.2	11.0
Syndicated customer transactions	2.7	6.6
Total	37.8	50.8

New customer financing solutions per quarter long-term loans (Skr billion)

New customer financing solutions, category (excluding syndicated customer transactions)

# Sign of strength in turbulent borrowing market

During the year, SEK's borrowing was extremely successful despite a market characterised by worry and uncertainty. During the first nine months of the year, Skr 85.1 billion was borrowed, Skr 23.8 billion more than the borrowing for the full year 2006.

During the third quarter, the volume of borrowings amounted to Skr 13.3 billion. Loans raised included a threeyear global bond amounting to USD 1.25 billion.

The third quarter was seriously affected by the credit worry that started in the US subprime mortgage market and has since spread worldwide. This worry had an adverse affect on the credit risk market, resulting in a dramatic fall in liquidity.

During the quarter, SEK demonstrated yet again that it could provide its customers with attractive and long-term financial solutions even when the world's credit markets are in turmoil.

The development strengthened SEK's position as investors showed an increased tendency to move to players with a high credit standing. During the quarter, the conditions for SEK's short-term borrowing improved, while the terms for long-term borrowing remained unchanged, which is a sign of strength.

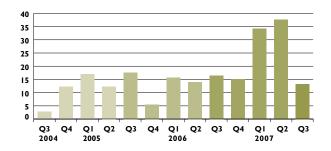

SEK's successful borrowing is very important as, even in times of crisis in the financial market, SEK must be able to provide customers with attractive and long-term financial solutions.

During the third quarter, SEK executed a three-year global bond amounting to USD 1.25 billion. The execution was very successful and was oversubscribed quickly by investors from all over the world. SEK was the first issuer, not being a supranational institution or directly guaranteed by an individual state, to succeed in executing a global bond since the beginning of the liquidity crisis. Initially the bond was set at USD 1 billion, but as a consequence of the strong interest from investors, which resulted in an early oversubscription, SEK increased the volume by USD 250 million. The bond was sold to investors in Europe, the Middle East, the US, Asia and Africa. The quarter was also marked by a large number of smaller transactions from Japan, of which a large proportion concerned small structured transactions.

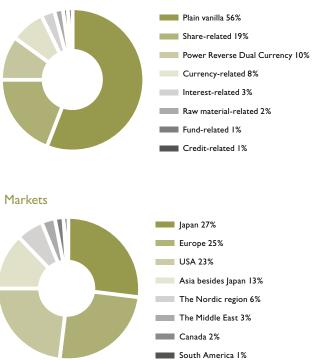

Within the framework of SEK's Investor Relations activities, the US market was the focus of special attention during the third quarter.

# Comments to the financial accounts

# **INCOME STATEMENT**

Performance measurement and return on equity (Skr mn)

· · · ·	Jan – Sep, 2007	Jan – Sep, 2006
Core Earnings	396.0	409.2
Change in market valuation		
according to IFRS (Note 2)	-24.2	-27.6
Operating profit (IFRS)	371.8	381.6
Pre-tax return on equity (Core	Earnings) 12.6%	14.3%
After-tax return on equity (Cor	e Earnings) 9.1%	10.3%
Pre-tax return on equity (IFRS)	11.7%	12.8%
After-tax return on equity (IFRS	6) 8.4%	9.2%

In 2007, SEK for the first time is presenting its financial statements in accordance with IFRS. The so-called Core Earnings is the most relevant performance measurement, as it exclude valuation effects of items which SEK market value in accordance with IFRS, despite that they are economically secured. Therefore SEK disclose Core Earnings, which is operating profit before certain market valuation effects and operating profit (IFRS), which is operating profit after certain market valuation effects. Furthermore, SEK presents return on equity based both on Core Earnings and operating profit (IFRS). Based on its experience and knowledge of the functioning of SEK's economic hedging, management believes that Core Earnings better than operating profit (IFRS) reflects the effect of the economic hedge relationships on SEK's activities.

# Net interest earnings

Net interest earnings totaled Skr 600.7 million (592.0), an increase by 1 percent. The increase was due to increased average volumes of interest-bearing assets.

The average volume of debt-financed assets (including credits in the S-system) totaled Skr 227 billion (198), an increase by 15 percent. The average margin of such volume was 0.27 percent p.a. (0.31), a decrease by 13 percent. The decrease in average margins was due to decreased margins in the liquidity portfolio as well as in the credit portfolio.

# Net results of financial transactions

In Core Earnings net results of financial transactions totaled Skr 1.8 million (21.8). The decrease was mainly

due to unrealized valuation effects in the trading portfolio amounting to Skr –34.6 million (3.0), which however was counteracted by an increase in realized gains in repurchased debt etc., amounting to Skr 36.2 million (19.8). Unrealized market valuation effects in the trading portfolio are related to changes in credit spreads during the third quarter due to the turbulent market conditions. The assets in the trading portfolio have an average remaining maturity of less than two years and are deemed to be of high quality. No material realized losses are expected in the portfolio.

In the operating profit (IFRS) additional market valuation effects are added amounting to Skr –24.2 million (–27.6) related to other items in the balance sheet (see table above and Note 2). The effects are mainly related to accounting mismatch that arise in the operating profit (IFRS) due to that certain items should be measured at fair value while corresponding items are measured at amortized cost.

## Other

Administrative expenses totaled Skr 191.9 million (180.4), an increase by 6 percent. Administrative expenses include an estimated cost for the general incentive system for all personnel amounting to Skr 10.9 million (0.2).

No credit losses were incurred (0.0).

## Core Earnings

Core Earnings amounted to Skr 396.0 million (409.2), a decrease by 3 percent. The decrease in Core Earnings was mainly related to a decrease in net result of financial transactions related to unrealized losses in the trading portfolio.

# Net profit

Net profit amounted to Skr 267.7 million (272.1).

## Comments on the first six months

Of the previously published operating profit (IFRS) for the first six months 2007, an adjustment totaling Skr –27.0 million has been made. The adjustment is related to valuation effects according to IFRS that should be accounted for through the income statement instead of directly to equity. See Note 2 and Note 9. Core Earnings has not been affected by the adjustment.

# **BALANCE SHEET**

# Total Assets and Liquidity

Higher volumes of assets is recognized in the balance sheets mainly due to the fact that all derivatives under IFRS are carried at fair value while previously mainly carried at amortized costs. The gross value of certain balance sheet items, which effectively hedge each other, primarily the items derivatives (assets or liabilities) and senior securities issued, is to some extent uncertain. There is, however, no such uncertainty with regard to the value of net assets. (Note 7.)

SEK's total assets at period-end increased to Skr 272.1 billion (y-e: 245.2), an increase by 11 percent. The increase was due mainly to increased volumes in the liquidity portfolio and in the credit portfolio (Note 5).

The total amount of credits outstanding and credits committed though not yet disbursed increased to Skr 120.0 billion at period-end (y-e: 113.0), which was an increase by 6 percent. Of such amount Skr 98.9 billion (y-e: 91.1) represented credits outstanding, an increase by 9 percent. Of credits outstanding Skr 9.0 billion (y-e: 9.1) represented credits in the S-system, a decrease by 1 percent. The aggregate amount of outstanding offers for new credits totaled Skr 48.3 billion (y-e: 25.8) at period-end, an increase by 87 percent.

The aggregate volume of funds borrowed and shareholders' funds exceeded the aggregate volume of credits outstanding and credits committed though not yet disbursed at all maturities. Accordingly, all credit commitments are funded through maturity.

There were no major shifts in the breakdown of SEK's counterparty risk exposures. Of the total risk exposures, 65 percent (y-e: 67) were against banks, mortgage institutions and other financial institutions; 19 percent (y-e: 19) were against highly rated OECD states; 8 percent (y-e: 8) were against local and regional authorities; and 8 percent (y-e: 6) were against corporations. SEK's exposures towards derivative counterparties are very limited compared with the volume of derivatives shown as assets since most derivatives are subject to collateral agreements. See also the table Counterparty Risk Exposures.

# Capital adequacy and counterparty risk exposures

# **Capital requirement**

The capital adequacy ratio of SEK as a consolidated financial entity, calculated according to Basel-II, Pillar 1 (i.e., the new regulation), as of September 30, 2007 was 18.3 percent before inclusion of effects related to the transitional rules (see below). Inclusive of effects related to the transitional rules – which limit the full effect of the decrease in capital required according to the new, more risk-sensitive, regulations compared with the older, less risk-sensitive, regulations – the capital adequacy ratio of SEK as a consolidated financial entity as of September 30, 2007 was 9.4 percent (13.8 percent as of December 31, 2006 according to the old regulations, Basel-I), of which the Tier-1-ratio was 6.8 percent (9.4 percent as of December 31, 2006, according to the old regulations, Basel-I).

Accordingly, the transitional rules negatively affected the capital adequacy ratio by 8.9 percentage points. For SEK, the legal, formal capital requirement will decrease continuously, since the new capital adequacy regulations better reflect the low risk in the credit portfolio. Full effect of the decreased capital requirement will not be reached until year 2010. SEK's objective for capital strength is essentially higher than the authorities' minimum capital requirement.

For further information on capital adequacy, risks and the transition to Basel-II, see Note 14.

The adjusted capital adequacy ratios are calculated with inclusion in the capital base of SEK's guarantee capital, amounting to Skr 600 million, in addition to the legal core-capital base. In the table below, the capital requirement according to the authorities' regulations is expressed – with the intention of simplifying comparisons with previous reports – also as amounts corresponding to risk-weighted assets multiplied by the factor 12.5. For operational risk and market risk these amounts are derived, since the regulations for these types of risks directly determine capital requirements.

According to the law (2006:1372) on implementation of the new capital adequacy regulations, the capital base must during 2007 not be less than 95 percent of the capital requirement according to the older regulations (Basel-I). The Basel-I-based add-on is made due to this transitional rule.

The table shows a breakdown, by counterparty category, of SEK's total counterparty risk exposure related to credits, interest-bearing securities and off-balance sheet items.

# Notes

All amounts are in Skr million, unless otherwise indicated. All figures concerns the Consolidated Group, unless otherwise indicated.

### Not I. Applied accounting principles

The accounting principles described in SEK's annual report for the year 2006 have been applied unchanged with the following material exceptions.

From January 1, 2007, SEK is applying International Financial Reporting Standards (IFRS) as published by International Accounting Standard Board (IASB) and endorsed by EU in its consolidated accounts and IFRS modified by Swedish law in accordance with regulations by the Swedish Financial Supervisory Authorities (FFFS 2006:16) in the parent company accounts. SEK has applied IAS 34, Interim Financial Reporting, in this report. There are at present no material differences between the application of IFRS in the consolidated group and the application of IFRS modified by Swedish law in the parent company. The financial year 2006 constitutes the comparative year, and therefore, the opening balance for IFRS has been established as of January 1, 2006.

The accounting rules for financial instruments that are contained in IAS 39, IAS 32 and IFRS 7 are the areas where there are most material differences in accounting principles compared to previous accounting policies (Swedish GAAP). For previous accounting policies with regard to financial instruments se Notes I (g), I (j), I (p), and I (q) in annual report for the year 2006. For new accounting policies according to IFRS, see below.

Financial assets can be categorized mainly in four categories for valuation: financial assets at fair value through profit or loss; available-for-sale financial assets; loans and receivables; and held-to-maturity investments. There are only two categories available for financial liabilities: financial liabilities at fair value through profit or loss; and other financial liabilities. Derivatives are always classified as financial assets or liabilities at fair value through profit or loss. In the cases where SEK decides to categorize a financial asset or liability at fair value through profit or loss the purpose is always to avoid the mismatch that would otherwise arise in the income statement resulting from that the derivatives which economically hedges the risks in these instruments is valued at fair value through profit or loss. Book values for financial instruments in the above described valuation categories can be found in Note 6.

With regard to financial assets, the category loans and receivables constitute a main category for SEK. This category is used not only for loans originated by SEK but also for securities acquired by SEK that are not quoted on an active market. However, securities quoted on an active market can not be classified in the category loans and receivables. Therefore, a number of securities, deemed to be quoted on an active market, are classified as available-for-sale securities. Furthermore, a large part of financial assets that under previous accounting policies have been classified as held-for-trading will remain under a comparable classification in the category financial assets at fair value through profit or loss. However, certain financial assets that under previous accounting policies were classified as held-for-trading are in the opening balance under IFRS classified mainly as loans and receivables due to a change in the intention of the investments. (See also below in the section Effects on capital adequacy of amended classification of certain assets.)

Transactions in the category loans and receivables are measured at amortized costs. In the case were one or more derivatives is hedging currency and/or interest rate exposures, fair value hedge accounting is applied. Furthermore, for certain transactions classified as loans and receivables cash flow hedge accounting is applied. Assets that are classified as available-for-sale securities are carried at fair value, with changes in fair value recognized directly in equity. In the case where one or more derivatives are hedging currency and/or interest rate exposures, fair value hedge accounting is applied. However, in the case where one or more derivatives are hedging currency, interest rate and/or credit exposures such transactions are sometimes classified irrevocably as financial assets at fair value through profit or loss. No financial transactions have been classified as held-to-maturity investments.

A major part of senior securities issued is classified as financial liabilities at fair value through profit or loss. Another large part of senior securities issued is classified as other financial liabilities. In the category other financial liabilities transactions are measured at amortized costs. In the case where one or more derivatives is hedging currency, interest rate, and/or other exposures, fair value hedge accounting is applied. Subordinated debt is classified as other financial liabilities and is mainly subject to fair value hedge accounting. When applying fair value hedge accounting on perpetual subordinated debt, hedging of the subordinated debt is made for the time period which corresponds to the time to maturity of the derivative.

In accordance with IAS 39 all derivatives must be measured at fair value. In order to give a true and fair view of its active and extensive risk management operation SEK finds it necessary to use the possibilities given in IAS 39 to account for economic hedging activities. With regards to accounting for economic hedges according to IAS 39, one of the two main alternatives available to SEK is to apply hedge accounting. With regard to hedging of financial exposures in financial transactions either fair value hedge accounting or cash flow hedge accounting can be applied. Fair value hedge accounting can be applied on transactions where a derivative is hedging a fixed interest rate risk arising from a hedged asset or liability. The same derivative or another derivative can also be hedging foreign exchange risk or credit risk. When applying fair value hedge accounting the amortized cost value of the underlying hedged item will be remeasured to reflect the change in fair value attributable to the exposures that has been hedged. The other alternative (besides hedge accounting) is to designate fixed interest rate assets and liabilities which are hedged by derivatives irrevocably at initial recognition as instruments at fair value through profit or loss. One main difference between those two alternatives is that the latter includes valuing of the hedged item to its full fair value, while when applying fair value hedge accounting the underlying asset or liability which is hedged is valued at fair value through profit or loss only with regard to the components which the derivative is hedging. In some instances, cash flow hedge accounting will be applicable in SEK's accounting. When applying cash flow hedge accounting, both hedged and hedging items is measured at amortized costs through profit or loss while fair value changes in the derivative are measured directly to equity.

When changes in the difference between fair value and amortized cost (unrealized gains or losses) are recorded in the income statement they are reported as one component of net results of financial transactions. When changes in the difference between fair value and amortized cost (unrealized gains or losses) are recorded directly in equity the accumulated changes are reported as one component of reserves.

SEK from time to time reacquires its debt instruments. The nominal value of reacquired debt is deducted from the corresponding liability on the balance sheet. No amortization of premium or discount or other components (remuneration for interest rate differentials, etc.) is made in net interest earnings. Realized gains when reacquiring own debt instruments is accounted for on the business day in the income statement as one component of net results of financial transactions.

In accordance with IFRS equity consists of the following items: share capital; reserves; profit carried forward; and net profit for the period. Reserves consist of the following items: legal reserve; after-tax portion of untaxed reserves; and fair value reserve (including for SEK reserve for fair value changes on available-for-sale assets and reserve for fair value changes on derivatives in cash flow hedges). In accordance with IFRS, equity is not categorized into non-distributable and distributable capital.

# Effects on capital adequacy of amended classification of certain assets

SEK has, in the opening balance under IFRS, classified certain financial assets that under previous accounting policies were classified as held-fortrading mainly as loans and receivables. Besides the accounting consequences, the classification will result in a change in capital adequacy requirements for these assets. See further section Capital Adequacy and Counterparty Risk Exposures.

# Note 2. Net results of financial transactions

	Jan – Sep, 2007	Jan – Sep, 2006	Jan – Dec, 2006
Net results of financial transactions were related to:			
Realized and unrealized results related to held-for-trading securities	-33.8	3.5	4.0
Currency exchange effects	-0.6	-1.5	-0.2
Total net results of financial transactions before results of repurchased debt, etc., and certain fair value changes	-34.4	2.0	3.8
Realized results of repurchased debt, etc.	36.2	19.8	25.1
Total net results of financial transactions after results of repurchased debt, etc.,			
but before certain fair value changes	1.8	21.8	28.9
Changes in fair value related to financial assets except held-for-trading securities,			
financial liabilities and related derivatives	-24.2	-27.6	-36.8
Total net results of financial transactions	-22.4	-5.8	-7.9

Of the previously published operating profit (IFRS) for the first six months 2007, an adjustment totaling Skr -27.0 million has been made. The adjustment is related to valuation effects according to IFRS that should be accounted for through the income statement instead of directly to equity. Adjusted items are "Change in fair value related to financial assets except held for-trading-securities, financial liabilities and related derivatives" and is included in the item "Net result of financial transactions" and "Change in fair value directly in equity for available-for-sale securities" included in the item "Change in equity" (Note 9). The adjustment is related to available-for-sale securities where, in connection with hedge accounting of such assets, a part of the valuation effects should be accounted for through the income statement and not directly to equity. Operating profit (IFRS) has been reduced by Skr 27.0 million after the adjustment and is then amounting to Skr 265.6 million. Closing balance of equity as of June 30, 2007 has not been affected. Core Earnings has not been affected by the adjustment.

## Note 3.Taxes

Reported amounts of taxes for the nine-month period ended September 30 represent profits before appropriation multiplied by the standard tax rate (28%), with the addition of certain tax costs related to the holding of untaxed reserves. No allocations to, or dissolutions of, untaxed reserves have been made before the calculation of taxes. Such allocations, or dissolutions, may be determined only on a full-year basis. The Company estimates that the standard tax rate gives an accepable approximation of the effective tax rate.

## Note 4. Earnings per share

Earnings per share: Net profit for the period divided by the number of shares.

# Note 5. Credits and liquidity

SEK considers that credits in the form of interest-bearing securities is a part of SEK's total credits. On the other hand, deposits with banks and states, nostro and repos are not a part of total credits, although they are included in the items credits to credit institutions and credits to the public. Thus, SEK's total credits and liquidity are calculated as follows:

Credits:	September 30, 2007	December 31,2006
Credits in the form of interest-bearing securities	38,254.9	39,013.1
Credits to credit institutions	21,248.4	14,147.3
Credits to the public	46,692.4	42,021.1
Less:		
Deposits, nostro and repos	-7,869.2	-4,094.8
Total credits	98,326.5	91,086.7
Liquidity:	September 30, 2007	December 31, 2006
Treasuries/Government bonds	1,811.9	1,810.5
Other interest-bearing securities except credits	138,664.0	117,985.0
Deposits, nostro and repos	7,869.2	4,094.8
Total liquidity	148,345.1	123,890.3

# Note 6. Classification of financial assets and liabilities

Financial assets by accounting category:	Sept			
	Total	Assets at fair value	Available- for sale <sup>1)</sup>	Loans and receivables <sup>2)</sup>
Treasuries/government bonds	1,811.9	1,393.2		418.7
Other interest-bearing securities except credits	138,664.0	22,301.2	8,038.3	108,324.5
Credits in the form of interest-bearing securities	38,254.9	1,935.5	3,086.4	33,233.1
Credits to credit institutions	21,248.4			21,248.4
Credits to the public	46,692.4			46,692.4
Derivatives	15,934.0	15,934.0		
Total financial assets	262,605.6	41,563.9	, 24.7	209,917.1

I) Of assets available-for-sale approximately 25% are subject to fair value hedge accounting.

2) Of loans and receivables approximately 9% are subject to fair value hedge accounting and 2% are subject to cash flow hedge accounting.

Financial liabilities by accounting category:	Sep			
			Other	
	Total	Liabilities at fair value	financial liabilities <sup>3)</sup>	
Borrowing from credit institutions	871.6		871.6	
Borrowing from the public	46.6		46.6	
Senior securities issued	234,714.5	108,730.3	125,984.1	
Derivatives	17,418.1	17,418.1		
Subordinated securities issued	2,933.7		2,933.7	
Total financial liabilities	255,984.5	126,148.4	129,836.1	

3) Of other financial liabilities approximately 75% are subject to fair value hedge accounting.

Financial assets by accounting category:	Dece			
	Total	Assets at fair value	Available- for-sale 4)	Loans and receivables <sup>5)</sup>
Treasuries/government bonds	1,810.5	1,381.7		428.8
Other interest-bearing securities except credits	117,985.0	18,755.5	8,037.I	91,192.4
Credits in the form of interest-bearing securities	39,013.1	2,214.9	3,126.6	33,671.6
Credits to credit institutions	14,147.3			14,147.3
Credits to the public	42,021.1			42,021.1
Derivatives	22,561.9	22,561.9		
Total financial assets	237,538.9	44,914.0	11,163.7	181,461.2

4) Of assets available-for-sale approximately 30% are subject to fair value hedge accounting.

5) Of loans and receivables approximately 12% are subject to fair value hedge accounting and 2% are subject to cash flow hedge accounting.

Financial liabilities by accounting category:	Dec			
	Total	Liabilities at fair value	Other financial liabilities <sup>6)</sup>	
Borrowing from credit institutions	3,245.6		3,245.6	
Borrowing from the public	56.0		56.0	
Senior securities issued	211,948.0	102,361.6	109,586.4	
Derivatives	15,600.6	15,600.6		
Subordinated securities issued	3,104.6		3,104.6	
Total financial liabilities	233,954.8	117,962.2	115,992.6	

6) Of other financial liabilities approximately 72% are subject to fair value hedge accounting.

The amount of total assets as of September 30, 2007, Skr 269.7 billion, was approximately Skr 0.2 billion lower than it would have been if the currency exchange rates as of December 31, 2006, had been unchanged. During the nine-month period repayments of long-term debt, including foreign exchange effects, have been made with approximately Skr 66.7 billion, and net increase of own debt reurchased amounted to approximately Skr 1.2 billion.

# Note 7. Derivatives

	September 30, 2007			December 31,2006		
	Assets	Liabilities	Nominal	Assets	Liabilities	Nominal
Derivate instruments by categories:	Fair value	Fair value	amounts	Fair value	Fair value	amounts
Currency related contracts	3,704.4	7,819.1	225,107.1	12,851.6	9,677.0	162,811.1
Interest rate related contracts	8,452.6	7,697.9	205,745.8	5,298.3	3,127.6	159,677.0
Equity related contracts	3,234.3	1,577.3	33,861.9	4,412.0	1,593.9	51,712.3
Contracts rel. to commodities, credit risk, etc.	542.7	323.9	29,293.0	-	1,202.1	6,013.0
Total derivatives	15,934.0	17,418.2	494,007.8	22,561.9	15,600.6	380,213.4

In accordance with SEK's policies with regard to counterparty, interest rate, currency exchange, and other exposures, SEK uses, and SEK is a party to, different kinds of derivative instruments, mostly various interest rate related and currency exchange related contracts (swaps, etc.). From January 1, 2007, these contracts are carried at fair value in the balance sheet on a contract-by-contract basis.

SEK uses derivative contracts, free-standing and embedded, whose fair values in certain cases are difficult to establish exactly. Those contracts do not have any directly observable market quotations and, therefore, the values have to be derived from internal calcualtions based on complex models. All such contracts are part of exactly matched hedge relationships, implying that the uncertainty that exists about the value of one individual balance sheet item (asset or liability) always is exactly mirrored of an offsetting balance sheet item (liability or asset) with identical value, however with an opposite sign.

Due to this, the value of certain balance sheet items, primarily the items derivatives (assets or liabilities) and senior securities issued, who effectively hedge each other, to some extent is uncertain. However, it should be noted that there is no such uncertainty with regard to the value of net assets. The nominal amounts of derivative instruments do not reflect real exposures. In the case where a collateral agreement has been negotiated with the counterpart, the threshold amount under the collateral agreement represents real exposures. In the case where no collateral agreement has been negotiated with the counterpart, the positive fair value represents the real exposure. In almost all cases SEK has negotiated collateral agreements. See table Counterparty Risk Exposures for amounts of risk exposures related to derivatives, etc.

## Note 8. Past-due credits

In accordance with the Swedish Financial Supervisory Authority's regulations, the Company reports credits with a principal or interest that is more than 60 days past-due as past-due credits. The aggregate past-due amount of principal and interest on such credits was Skr 0.9 million (y-e: 1.0). The principal amount not past due on such credits was Skr 18.8 million (y-e: 2.9).

# Note 9. Change in equity

	January – September, 2007						
_	Equity kapital	Share- capital <sup>1)</sup>	Reserves: Legal reserve	After-tax portion of untaxed reserves	Fair value reserve		Net profit for the period
Opening balance of equity Dividend	4,250.7	990.0	198.0	918.3	-61.3	2,205.7

Closing balance of equity	4,250.7	990.0	198.0	918.3	-61.3	I,850.2	355.5

<sup>1)</sup> 640,000 A-shares and 350,000 B-shares at a quote value amount of Skr 1,000 each.

Of the previously published operating profit (IFRS) for the first six months 2007, an adjustment totaling Skr -27.0 million has been made. The adjustment is related to valuation effects according to IFRS that should be accounted for through the income statement instead of directly to equity. Adjusted items are "Change in fair value related to financial assets except held for-trading-securities, financial liabilities and related derivatives" and is included in the item "Net result of financial transactions" (Note 2) and "Change in fair value directly in equity for available-forsale securities" included in the item "Change in equity". The adjustment is related to available-for-sale securities where, in connection with hedge accounting of such assets, a part of the valuation effects should be accounted for through the income statement and not directly to equity. Operating profit (IFRS) has been reduced by Skr 27.0 million after the adjustment and is then amounting to Skr 265.6 million. Closing balance of equity as of June 30, 2007 has not been affected. Core Earnings has not been affected by the adjustment.

## Note 10. S-system

Pursuant to an agreement between SEK and the Swedish state, SEK has specific conditions for granting credits in the S-system. See Note I (b) and I (c) in the 2006 Annual Report. The remuneration from the S-system to SEK in accordance with the agreement, Skr 17.9 million (20.4), is shown as a part of operating income in the income statements for SEK exclusive of the S-system. The assets and liabilities of the S-system are included in SEK's balance sheets.

Income statements for the S-system:

	Jan – Sep, 2007	Jan – Sep, 2006	Jan – Dec, 2006	
Operating income	-20.9	-6.0	-12.4	
Remuneration to SEK	-17.9	-20.4	-25.4	
Reimbursement from the State	38.8	26.4	37.8	
Net	0.0	0.0	0.0	

Balance sheets for the S-system (included in SEK's balance sheets):

	September 30, 2007	December 31,2006	
Credits	9,048.0	9,131.7	
Derivatives	45.5	92.5	
Other assets	135.5	171.5	
Total assets	9,229.0	9,395.7	
Liabilities	9,187.3	9,307.8	
Derivatives	41.7	87.9	
Equity	_	_	
Total liabilities and equity	9,229.0	9,395.7	

# Note II. Segment Reporting

In accordance with the definition in IAS 14 SEK has the following business segments: granting of credits; advisory services; and capital market products. Advisory services and capital market products is similar with respect to risks and returns. Segment revenues represents less than 10 percent of the total revenues, and is therefore not separetely disclosed.

# Note 12. Definitions of the financial highlights

- Core Earnings, i.e. profit exclusive of fair value changes according to IFRS and effects related to changes of untaxed reserves and tax. Fair value changes according to IFRS relates to fair value changes of financial assets except held-for-trading securities, financial liabilities and related derivatives. (See Note 2.)
- 2) Return on equity, i.e. operating profit, before and after taxes, respectively, in the latter case reduced by 28 percent standard tax, expressed as a percentage of the opening balance of equity. When calculating return on equity based on Core Earnings, excluded from the opening balance of equity reserves are related to assets which can be sold and reserves for Cash Flow Hedge Accounting.
- 3) Operating profit (IFRS), i.e. profit inclusive of fair value changes according to IFRS but ecxlusive of effects related to changes of untaxed reserves and tax.
- 4) Translated at the September 30, 2007, exchange rate of Skr 6.495 per USD. New borrowings are translated at current exchange rates.
- 5) Capital Adequacy Ratio, i.e. capital base expressed as a precentage of risk-weighted claims in accordance with Pillar I under Basle II excluding adjustment during the transitional period 2007-2009 regarding required minimum capital. Please see "Capital adequacy and counterparty risk exposures" in this interim report to receive a complete description of calculation of required minimum capital during the transitional period. The adjusted capital adequacy ratio has been calculated with inclusion in the Tier-I capital base of guarantee capital from SEK's shareholder amounting to Skr 600 million (though such inclusion is not regulatory approved) expressed as a precentage of risk weighted claims.
- 6) Capital Adequacy Ratio, i.e. capital base expressed as a precentage of risk-weighted claims in accordance with Pillar I under Basle II calculated in accordance with 5 § in the law (2006:1372) on implementation of the law on capital adequacy and large exposures (2006:1371).
- 7) Capital Adequacy Ratio, i.e. capital base expressed as a precentage of risk-weighted claims in accordance with Basel I. The adjusted capital adequacy ratio has been calculated with inclusion in the Tier-1 capital base of guarantee capital from SEK's shareholder amounting to Skr 600 million (though such inclusion is not regulatory approved) expressed as a precentage of risk weighted claims.
- 8) Cash and cash equivalents represents short term, liquid instruments wich immediately can be converted into cash and where the amount is known in advance.

The definitions of other Financial Highlights are included in 2006 Annual Report, Note 32.

**Note 13. Effects from implementing IFRS** The application of IFRS from January 1, 2007, has the following material effects on the comparison figures for income statements, balance sheets and equity (all figures refer to the consolidated group):

Income statements (Skr mn)	Jan – Sep, 2006	Jan – Dec, 2006
Net interest revenues according to previous regulations	595.2	797.8
Remuneration from the S-system (previously shown separately)	20.4	25.4
Elimination of accruals of repurchased dept etc	-23.6	-30.2
Net interest revenues according to IFRS	592.0	793.0
Net results of financial transactions according to previous regulations	2.0	3.8
Realized results of repurchased debt etc	19.8	25.1
Fair value changes of financial assets except held-for-trading, financial liabilities and derivatives	-27.6	-36.8
Net results of financial transactions according to IFRS	-5.8	-7.9
Operating profit according to previous regulations	413.0	543.2
Adjustment	-31.4	-41.9
Operating profit according to IFRS	381.6	501.3
Taxes on operating profit according to previous regulations	-118.4	-157.6
Adjustment	8.9	11.8
Taxes on operating profit according IFRS	-109.5	-145.8
Net profit according to previous regulations	294.6	385.6
Adjustment	-22.5	-30. I
Net profit according to IFRS	272.1	355.5

Balance sheets		January 1,2007	January 1,2006			
(Skr billion)	Previous regulations	Adjustment	IFRSPrevi	ous regulations A	Adjustment	IFRS
Total assets	229.2	16.0	245.2	207.5	3.8	211.3

Equity in accordance with IFRS	4,250.7	3,965.8

# Note 14. Capital adequacy

As of February I, 2007, new capital adequacy regulations, Basel-II, were implemented in Sweden. The regulations are based on the so called Basel framework, and they have been implemented throughout the entire EU. According to the new regulations, the capital requirement will, to a higher degree than previously, be related to the risks. One of the novelties is that the minimum capital requirement for credit risks now, provided permission from the Swedish Financial Supervisory Authority, may be based on the company's internal risk measures (the "IRB-method"). Another essential novelty is the additional capital requirement for operational risk, in addition to the capital requirement for credit risks and market risks.

The transition to regulations that to a higher degree than previously are based on real risk, may imply large changes in the minimum capital requirement. As from 2007 the capital requirement shall be determined, primarily, based on the new, more risk sensitive, regulations. The legislator has, however, chosen not to immediately allow the full effect of the new regulations in those cases when they would result in a lower capital requirement than a continuously reduced capital requirement calculated on the basis of the old rules. Therefore, during the transitional period 2007–2009, SEK must make parallel calculations of its capital requirement based on the old, less risk sensitive, rules. In case the capital requirement calculated under the old rules - however, reduced to 95 percent in 2007, 90 percent in 2008, and 80 percent in 2009, respectively - exceeds the capital requirement based on the new rules, the capital requirement based on the old rules shall constitute the minimum capital requirement during the transitional period. For companies, whose capital requirement should decrease if only the new rules were applied, the full effect of the new rules is accordingly not allowed during the transitional period. This can be stated as an asymmetric implementation of the new rules, which discriminates against companies whose risks are lower than what was appreciated by the old regulations.

#### Capital requirement and capital base

In conjunction with the transition to IFRS and a related analysis of different types of assets, SEK has determined to reclassify a group of securitized assets. In summary, the reclassification has resulted in a move of the said assets from the trading book to, what is called, the banking book. The current assets are of the type Asset-Backed Securities (ABS) and are all of very high creditworthiness. In addition to the accounting implications, the reclassification results in a significant reduction in the capital adequacy requirement for these assets according to Basel-II. Under the new capital adequacy regulations, these assets will have a risk-weight of approximately 7 percent, which is in line with SEK 's internal assessment of the real credit risk. Under the old, less risk sensitive, regulations, these assets are risk-weighted by varying weights between 50 percent and 100 percent in the banking book or, if they would have continued to be classified as trading book assets, approximately 20 percent.

Accordingly, the reclassification results in a material increase in the capital requirement under the old, less risk-sensitive, regulations. Consequently, due to the transitional rules, the decrease in the capital requirement under the new, more risk-sensitive, regulations will not be effective in the short run. Contrary, the aggregate capital requirement under the new regulations will, when taking into account the transitional rules, increase. However, SEK continues to have a god margin above the minimum capital requirement.

The capital adequacy ratio of SEK as a consolidated financial entity, calculate according to Basel-II, Pillar I (i.e., the new regulation), as of September 30, 2007 was 18.3 percent before inclusion of effects related to the transitional rules. Inclusive of effects related to the transitional rules – which limit the full effect of the decrease in capital required according to the new, more risk-sensitive, regulations compared with the older, less risk-sensitive, regulations – the capital adequacy ratio of SEK as a consolidated financial entity as of September 30, 2007 was 9.4 percent (13.8 percent as of December 31, 2006), of which the Tier- 1-ratio was 6,8 percent (9.4 percent as of December 31, 2006, according to the old regulations, Basel-I).

Accordingly, the transitional rules negatively affected the capital adequacy ratio by 8.9 percentage points. For SEK, the legal capital

requirement will decrease continuously, since the new capital adequacy regulations better reflect the low risk in the credit portfolio. Full effect of the decreased capital requirement will not be reached until year 2010 when the transitional rules expire. SEK's objective for capital strength is essentially higher than the authorities' minimum capital requirement.

In addition to the minimum capital requirement, the companies (subject to capital adequacy regulations) must also undertake internal capital assessments under Pillar 2. The internal capital assessment shall, among other things, take into account risks that are not included in Pillar 1, such as the capital requirement for strategic risk and the rating agencies' views on the capital need of the company. SEK has always had a higher capital ratio than what has been formally required. Also the supervisory authorities expect that the individual company will in the future have a capital base that exceeds the formal minimum capital requirement.

Both the core capital and the total capital base decrease under the new regulations. This is due mainly to deductions in the capital base for an amount regarding expected losses. Such expected losses do not represent real, individually anticipated losses, but reflect a technically calculated amount. These losses are calculated according to law and regulations, based on information from SEK 's internal risk classification system. For SEK, as of September 30, 2007, such technically calculated amount was Skr 53 million. Half such amount reduces the core capital, and half reduces the supplementary capital. The calculations are characterized by prudence, such that risks are overestimated rather than underestimated. In addition there are safety-margins built into the risk classification system. This implies that the amount deducted from the capital base exceeds the amount of losses that SEK anticipates on an individual counterparty basis and, accordingly, also the loss reserves.

### Credit risks

For risk classification and quantification of credit risk SEK uses an internal ratings-based (IRB) approach. The Swedish Financial Supervisory Authority has approved SEK's IRB-method. There are two different IRB-approaches. SEK applies the Foundation Approach. Under the Foundation Approach, the company determines the probability of default within in year ("PD, Probability of Default") of its counterparties, while the remaining parameters are established by the Swedish Financial Supervisory Authority. Under the Advanced Approach, the company also determines loss given default ("LgD") and exposure at default ("EaD").

### **Operational risks**

The new regulations provide opportunities for the companies to use different methods for calculation of capital requirement for operational risks. For calculations of this capital requirement there are available the Basic Indicator Approach, which can be used without any permit from the Swedish Financial Supervisory Authority, and the more advanced methods - the Standardized Approach and Advanced Measurements Approaches which require specific permits from the Swedish Financial Supervisory Authority. SEK calculates the capital requirement for operational risks according to the Basic Indicator Approach. The capital requirement for operational risk under the Basic Indicator Approach equals 15 percent of a revenue indicator. The revenue indicator represents an average of the operational revenues during the last three years. The operational revenues are calculated as the sum of the following items: interest and leasing revenues, interest and leasing expenses, dividends received, commissions earned, commissions incurred net results of financial transactions, and other operational revenues.

### Market risks

For market risks, the capital required equals the aggregate of the capital requirement for counterparty credit risks in the trading book, for settlement risks, for positions in the trading book, and for currency exchange risks in the entire operation. The capital requirement for each respective risk type is calculated separately according to the Swedish Financial Supervisory Authority's regulations. The Interim Report provides a fair overview of the Parent Company's and the Group's operations, their financial position and results, and describes material risks and uncertainties facing the Parent Company and other companies in the Group.

# Auditor Review Report

To the Board of Directors in Swedish Export Credit Corporation (publ) Corp Id No 556084-0315

### Introduction

I have reviewed this interim report for the period January I – September 30, 2007. The Board of Directors and the President are responsible for the preparation and presentation of this interim report in accordance with IAS 34 Interim Reports and the Swedish Act on Annual Accounts for Credit Institutions and Securities Companies. My responsibility is to express a conclusion on this interim report, based on my review.

#### Scope of review

I conducted this review in accordance with the Swedish Standard of Review Engagements SÖG 2410 *Review of Interim Financial Information performed by the Independent auditor* of the company issued by FAR SRS. A review consists of making inquiries primarily of persons responsible for the financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the Auditing Standard in Sweden (RS) and other generally accepted auditing practices. Consequently the procedures undertaken in a review do not enable me to obtain assurance that I would become aware of all significant matters that might be identified in an audit. Accordingly, I do not express an audit opinion.

### Conclusions

Based on my review, nothing has come to my attention that causes me to believe that this press release is not prepared, in all material respects, in accordance with IAS 34 and the Swedish Act on Annual Accounts for Credit Institutions and Securities Companies.

Stockholm, November 30, 2007

Per Bergman Authorized Public Accountant

This Interim Report contains forward-looking statements. Forward-looking statements are statements that are not historical facts, including statements about our beliefs, expectations and intentions. Forward-looking statements are based on current plans, estimates and projections. Forward-looking statements speak only as of the date they are made, and the Company undertakes no obligation to update any forward-looking statement in light of new information or future events. Forward-looking statements involve inherent risks and uncertainties, most of which are difficult to predict and generally beyond the Company's control. You are cautioned that a number of important factors could cause actual results or outcomes to differ materially from those expressed in or implied by, the forward-looking statements. These factors include, among others, changes and valetility in currency exchange and interest rates; and changes in government policy and regulations and in political and social conditions.
