#### **Future expectations**

In the next period "Grindeks" will continue to put emphasis on new markets, thereby diversifying its activities and reducing risks. Company's experience in organizing business in 60 countries worldwide and strategy developed so far has already significantly promoted increase in sales volume in Poland and Vietnam. It is expected that in the other new markets "Grindeks" will reach even higher sales results as well.

Despite the diversification of the company's activities, one of the most influential business risks is the geopolitical situation in Russia and Ukraine. Decrease of the value of national currencies or devaluation in CIS countries are factors negatively affecting company's performance indicators.

"Grindeks" pays great attention to the complementation of its product range. During this year company's product portfolio has been complemented with two new medicines. This includes the final dosage form of Ursodeoxycholic acid (UDCA), which was introduced in the beginning of this year.

"Grindeks" will continue optimization of current assets and cost reduction in positions which are not related to strategic company's development projects.
