Sectra PACS well positioned in KLAS rankings

Sectra PACS was ranked within the top 3 in both the KLAS Community Hospital PACS 2007 report and the KLAS Ambulatory/Imaging Center PACS 2007 Report.

KLAS independently monitors vendors' performance through active participation of healthcare organizations. The KLAS report categorizes each vendor product into a market segment in which similar products are compared and ranked based on data reported by healthcare professionals. The evaluations are used by care providers as the basis for procurement.

"Being well ranked in both the Community Hospital and Ambulatory/Imaging Center market segments is a recognition of the value we bring to our customers as their radiology IT partner", says Torbjörn Kronander, President of Sectra's medical operations. "These rankings are also a recognition of Sectra's highly professional team, and our commitment to fulfill our customers' needs."

Since 2005, Sectra has made extensive investments in direct sales and support on the US market. Previously, Sectra only sold PACS through partners in this market.
